前 言

中国千分之一人口生育率抽样调查，是一九八二年九月国家计划生育委员会在全国（除西藏、台湾外）二十八个省、自治区、直辖市组织进行的。

有关这次调查的工作过程、方案设计、主要成果及其初步分析等，已在《全国千分之一人口生育率抽样调查分析》（《人口与经济》专刊）中发表。

为了更加简单、鲜明地反映这次调查的主要结果，编绘了这本图集，供广大计划生育工作者和人口研究人员参考。

Preface

In September 1982, a fertility Sample Survey of one person every thousand was organized and conducted by The State Family Planning Commission in 28 provinces, autonomous regions and municipalities (excluding Tibet and Taiwan).

The work process, the designs, the major results and the initial analysis of the survey itself were given in the special issue of the journal «Population and Economics» under the title «Analysis of the National Fertility Sample Survey of One Person Every Thousand».

To Portray more clearly and vividly the major results of the survey the present collection of charts is thus brought into being for the easy reference of those workers and researchers on their family planning and population studies.
