Abstract

Pansystems theory is a transfield multilayer network-like and encyclopaedia-connecting research with the emphasis on pansystems (generalized systems, generalized relations or/and their various compositions/mutuals) and unification (melting the philosophy, mathematics, technology, aesthetics into a unified entity). This newborn direction was brewed in 1955-1975 and presented formally in 1976 and now enrolled as one of the new theories of modern systems science, one of the 100-methodologies of world mathematicians. It is a new type of pan-metaphysics, philosophy and non-philosophy, a new type of post-modern exploration of systems sciences. The former theories are due to the same author: Approximation-Transforming Theory and Equivalence Theory of Dynamics of Electromagnetic Media. There were about 500 papers of 100 authors published and had a style of their own in philosophy, mathematics, relativity, systems science, sociology, aesthetics and poetics, including a series of new explorations to many tens of topics:

Metaphilosophy, philosophical history, philosophical relativity, ontology, epistemology, methodology, philosophical logic, philosophical anthropology, philosophical unification theory of TGBZ (the true, the good, the beautiful and the Zen), philosophical category theory, buddhism philosophy, science philosophy, technological philosophy, existentialism philosophy, relational philosophy and relational logic, various realistics, mathematics and mathematical methodology, computer science, systems engineering, physics, mechanics, panentropy, medicine, biology, ecol-

gy, sociology, ethics, paradox theory, regret theory, ego theory, economics, management, games theory, pedagogy, psychology, modelling, simulation, somatics, qigong, etc.

The category pansystems possesses many confinements or tendencies according to corresponding contexes: A new world view, A new type of philosophy and non-philosophy and pan-metaphysics, Encyclopaedia-connecting category/ network, Many hundreds of TMs: concepts, principles, methods, theorems, techniques, programmings, formulae, concrete forms of PMT(Philosophy, Mathematics, Technology, etc.). Pansystems (in a certain sense): Generalized theoretic or abstract or virtual traffic network/ communication satellite/ relay station/ meridian-parallel/ coordinate systems/ jingluo/ taiji/ dao/ yi/ relation-environment/ comprehension/ DOS/ dynamical windows/ flexible pronouns/ flexible addresses/ flexible blocks/ mobile inns/ metalanguage/ metamethods/ metalogics/ metaframes/ metaprogrammings/ building bricks/ elementary particles, etc.

The differences of pansystems philosophy from various researches of philosophies include mainly four respects: (1) 6-DSPP(Emphasis on the Synthetic 6-Pansystems Characteristics): Pansystems, Megacombination, Universality, Exactness, Concretment, Unification; (2) Original creation with relatively systemic researches of 10-30 Philosophies; (3) Panoptimization of the 10 Views: Existence, Change, Synthesis, Combination, Connection, Systems, Symmetry, Transformation, Shengke, Relativity; (4) Exploration to combination of the 12-inclinations of modern studies of philosophies.

In the pansystems philosophy and its encyclopaedia-connecting applications, there are many principles, categories, theories of various topics to be complemented, extended, developed, enriched or inherited: (1) Yijing: Taiji, Simplicity Principle, Pansymmetry, Change; (2) Taoism: Tao, Relativity, Dialectics, Beauty; (3) Confucius: Cognition, Pedagogy, Love, The Doctrine of the Mean, Kindheartedness, The Great Learning Dao; (4) Buddhism: Zen, Empty, Life Philosophy; (5) Sunzi: Strategy; (6) CTM: Metamedicine; (7) Pythagoras-Plato: Mathematization Thoughts; (8) Aristoteles: Ontology, Systems Principle; (9) Descartes: Methodology, Unification of Philosophy and Mathematics; (10) Leibnitz: Infinitesimal Calculus, Singleton, Combination Thought; (11) Kant: Epistemology, Substance, Phenomenon, Subject, Object, Relativity; (12) Hegel: Dialectics, Nachdenken (reflection), Self-consciousness, Entfremdung (alienation); (13) Poincaré: Scientific Methodology, Epistemology, Science Beauty; (14) Clausius: Entropy; (15) Hilbert: The 6th Problem, The 23rd Problem; (16) Einstein: Relativity, Methodology; (17) Neumann: Computer Principle, Thinking, Automata, Games Theory; (18) Russell: Relational Logic; (19) Hui Shi: The Difference-Identity Theory; (20) Gongsun Long: The Solid-White Theory; (21) Huayan zong: Dialectical Methodology; (22) Su Shi: Philosophical Poems; (23) Bohr: Complementary Principle; (24) J. F. Thomson: Paradox; (25) Whitehead: Principle of Extensive Abstraction; (26) Tarski: Semantics Hierarchy; (27) Gödel: Incompleteness; (28) Freud: Subconsciousness; (29) Watson: Behaviourism; (30) Maslow: Self-realization; (31) Fichte: Ego and Nonego; (32) Klein: Mathematical Unification, Pansymmetry; (33) Heisenberg: Physics Philosophy, Uncertainty Principle; (34) Bellman: Dynamical Programming, Optimal Principle; (35) Simon: Satisfactory Principle,

Management Philosophy; (36) Miller: The General Theory of Life; (37) Zadeh: Extension Principle, Composition, Control, Clustering...; (38) Bertalanffy: General Systems, Systems Thought; (39) Laszlo: Systems Philosophy; (40) Shannon: Combinatory Transmission, Information Philosophy; (41) Kalman: Observability Theory; (42) Mesarovic: Mathematical Investigations of General Systems; (43) Bunge: Systematism, Society Management; etc. including certain extensions, complements, development of theorems of many tens of mathematicians.

Certain new explorations after author's former works (about 10 books, 300 papers) are developed in the book, including a lot of surpassing of the books of author: 《The Pansystems View of the World》(Press of Chinese People University, 1990, pp. 1-316), 《Pansystems Methodology》(Press of Yanbian University, 1989, pp. 1-384), 《Pansystems Theory and Mathematical Methods》(Press of Jiangsu Education, 1990, pp. 1-122), 《Approximation-Transforming Theory and Pansystems Concepts in Mathematics》(Press of Hunan Science and Technology, 1984, pp. 1-416), 《Pansystems: A Philosophy Unconforming to God's Model》(Wuhan Press, 1996, pp. 1-473), etc. The emphasis of the book is paid on the new framework of pansystems theory and its new refined epitome, specially including the new development of pansystems relativity, pansystems philosophy, pansystems aesthetics, pansystems poetics. The concrete topics are concerning about 100 items: mathematics, sciences, technologies, medicine, humanities, aesthetics, poetics, sociology, history and philosophy, etc. The further important contents of the book are to reveal the clues, history, anecdotes, streams of consciousness, sub-consciousness, intuition, fortune, controversy, misunderstanding, adventure, coincidence, fantastic dreams, chaotic paradoxes, suffering love,

unsuccessful career, Pugmalion effect, creative experience and lessons of pansystems cause, including knacks of creation of many hundreds of new theorems and many tens of new theories. In a certain sense, the book realizes the ninth pansystems-generalization to encyclopaedic knowledge and the summation of nine pansystems-generalizations. In the book the theoretic development, popular science, fiction, fairy tales, creativity methodology, undertaking history, pansystems dictionary are combined with reportage, literary creation and poetic emotion of self-criticism, self-negation and self-surpassing. The contents of the book are presented as an expansion of the above mentioned items, which embody a certain exploration to encyclopaedia-connecting researches of a dreamlike advaturer, and incarnate a suffering love and fantastic dreams in chaotic paradoxes of a dreamer with multi-egos — a philosopher, mathematicean, systems scientist and a poet, whose maxim is

Fighting against Multifarious Paradoxes and Regrets Is the Great Joy of Life !

Pansystems

Fantastic Dreams in Chaotic Paradoxes

(The Birth of Pan – Metaphysics/Philosophy and Non-Philosophy)

Contents

Preface • Introduction

● **Pansystems Epitome: Philosophy and Non-Philosophy**

1. Philosophy and Non – Philosophy • Pan-Metaphysics: $1 + 1 = \infty$
2. Pansystems Relativity: Generalized Relations of Subjects/Objects and Prototypes/Panoptimizations
3. Panorama of Development

● **I Love Pansystems, Therefore I Am !**

1. Exploration with Apparent Comprehension but Actual Misunderstanding
2. Five Days and Nights
3. Bangchuidao Island: Stage A New Comeback
4. Symposiums on Mathematical Physics
5. Fuzzy Mathematics and Pansystems Mathematics

6. Remote Reviews
7. 1982: From Donghu Lake to Erhai Sea
8. Comments of Four Scholars
9. Worrying about Personal Gains and Losses
10. A Ten – Year – Long Pansystems Dream
11. Professor Qian Weichang: Two Letters and Three Prefaces
12. Vanish into Thin Air
13. Why Don't Contend : Function Theory of Pancomplex Variables ?
14. Fast Bird's – eye View: 1987 – – 1993
15. Dilemma: Love or Hate
16. Before and After the Nine Days and Nights
17. 1994: Paradox Symphony
18. 1995: Fantastic Change
19. Pansystems: Fighting against Multifarious Paradoxes Is the Great Joy of Life

● Pansystems Philosophy • Pansystems Aesthetics • Pansystems Poetics

1. Pansystems Zen – Unification about Various Disciplines
2. Pansystems Relativity
 - 2.1. The 6 Element – 4 Column – 4 Operation Model; 2.2. Yinyang Model; 2.3. Neumann Model; 2.4. Confucius Model; 2.5. Zhuangzi Model; 2.6. Sushi Model, Gong Sunlong Model and Bohr Theory; 2.7. Poincaré Model; 2.8. Whitehead Model; 2.9. Supercircle Comprehension Model; 2.10. Tarski Model; 2.11. Prototype Pattern Model; 2.12. Coordinate Model and Einstein's Relativity;

3. Pansystems Aesthetics
4. Pansystems Poetics
 - 4.1. Pansystems Theory on Man; 4.2. The General Trend of Aesthetics and Poetics over the World; 4.3. The Pansystems View of the Literature and Arts; 4.4. Principle of Aesthetic Feeling; 4.5. Relativity on Poetic Arts; 4.6. Pansystems Exteriors – Interiors; 4.7. Philosophy and Literature and Arts, Religion and Zen; 4.8. Pansystems Relativity: The Development, Discarding and Panoptimization of Transplanting Feeling Theory; 4.9. The Development, Discarding and Panoptimization for Distance Theory of Aesthetics; 4.10. From Phenomenon Aesthetics to Acceptance Aesthetics and Explanation Aesthetics; 4.11. Relativity on Poem Views; 4.12. The Pansystems View of Poems, Multi – implicit Functions; 4.13. The Pansystems View of the Artistic Conception; 4.14. The Pansystems View of Implication and Haziness Theory
5. More on Pansystems Relativity of The Creation and Appreciation of The Beautiful
6. Thirdly on Relativity: One Thousand Hamlets
7. Fourthly on Relativity: From 《River Snow》 to 《First Snow》
8. Pansystems Technology of Creation in Writing
 - 8.1. Combination – Confinement – Panoptimization Method; 8.2. Epitome – Extended Embodiment Method; 8.3. Pansystems Combination Method, the 10 Pansystems – Reduction Method; 8.4. Pansystems Comprehension Art; 8.5. The 10 Pansystems – Element Method; 8.6. Pansystems Programm Method; 8.7. Causality Panderivative Method; 8.8. Pansystems Qigong Method; 8.9. Pansystems Plot Method; 8.10. Other Methods

9. A Letter about Pansystems Poems (Appendix)
10. Discussion on Pansystems Poetics (Appendix)

● Pansystems Poems 200: Suffering Love

1. More Understanding Philosophy Caused by Difficulty to Look for Intercomprehending Friends
2. Pansystems Taiji
3. Pugmalion Effect
4. Pansystems Dream-Danse
5. River of Running Waves in Dream
6. I Love a Shadow
7. Ten Million Paradoxes
8. Remote Gentle Breeze
9. Can't the Rising Sun Be the Blood ?
10. Poems outside the Philosophy
11. Dreams Are of Non – Dreams
12. Stars Fall into Bamboo Forest
13. Fairy Tales about Stone River
14. Pansystems and Poems
15. Pansystems, Are You Exhausted in Walk ?
16. Love for Philosophy and Poems
17. Disciplines Are Like Sea with Fog and Superfog
18. Go on Pansystems A-Half-Month Tour
19. Love of Supernatural Fishes
20. Literary Notes on the Spring City
21. Chaos, Chaos, Chaos
22. Unprecedented Catastrophe
23. Grieve over Professor Guo Zhonghen's Death

24. Men in the Dream of Coloured Forest
25. Pansystems: Predestined Acquaintances and Comprehension

● Pansystems Star-Sea

1. Pansystems; 2. Generalized Systems; 3. Compound Generalized Systems; 4. Pansystems Relations, Generalized Relations; 5. N- Dimensional Spaces of Pansystems Philosophy, n-DSPP; 6. Pansystems Taiji, Pansystems Taiji Method; 7. The Five Mutuals of Pansystems; 8. The Six Pansystems Characteristics, Combination Method; 9. The Seven Elements of Pansystems; 10. The Eight Comprehensions of Pansystems; 11. Theory-Method; 12. Panoptimization and Paninferiority; 13. Composition; 14. Set Relations, Set-Like Pansystems; 15. Confined Characteristics of Binary Relations; 16. Whole-Part Relation, Analysis and Synthesis, Wholeness; 17. Body-Shadow Relation; 18. Equivalence Relation, Tolerance Relation; 19. The Pansystems Views of Difference, Identity and Panorder; 20. The Pansystems Views of Quantity and Number, Pansystems Quantification; 21. The Pansystems View of Infinitesimal Calculus, Panderivative; 22. The Pansystems View of Symmetry, Pansymmetry; 23. The Pansystems View of Clustering-Discoupling; 24. The Pansystems Views of Structure and Function; 25. The Pansystems View of Mechanism; 26. Shengke, Shengke Methods; 27. Series-Parallel Space; 28. Generalized Models of Series-Parallel Relations; 29. Controllability-Reachability; 30. Pansystems Operators; 31. Systems with Commonness and Nearness; 32. Panvariation; 33. Panhomomorphism, Panisomorphism; 34. Integrated Pansystems, Gene Pansystems; 35. Quotientization of Panweighted Network; 36. Pansystems Variation; 37. Synthetic Panoptimization; 38. Duality Transformation; 39. Hard-Soft Panderivative, Generalized Composition; 40. Composition-Complement Operator,

Panattractor, Panchaos; 41. Panweighted Recognition; 42. Theory-
 Methods of Nöether Type; 43. Pansystems Frameworks; 44. Dilworth
 Type Theorems; 45. Fixed Pansystems Theorems; 46. Pansystems Uni-
 valued Theorems; 47. Pansystems Communication Theorems; 48. Pan-
 systems Analysis of Motion-Rest, Motion-Rest Theorems; 49. The Panre-
 lation Principle; 50. The Four Mutual Principle of Pansystems Relations;
 51. Panproduct Principle; 52. Pansystems Univalued Principle; 53. The
 Three Elements of Competition-Distribution; 54. Layer-Index Model,
 Bidding Law; 55. Parental Model; 56. Game Model; 57. Pansystems
 Automata, Wuxing Model; 58. Panoptimization Epitome Principle; 59.
 Combination Explosion, The Five Mutuals of Bi-explosions; 60. Pansys-
 tems Discoupling Principle; 61. The Fast-Deep-Frequent Principle; 62.
 Epitome Principle of Damaged Information; 63. Pansystems Holographic
 Law; 64. Pansystems Analysis of Stratification; 65. Causality, Causality-
 Panderivative Analysis; 66. Pansystems Causality Analysis; 67. Pansys-
 tems Clustering Analysis; 68. Pansystems Series-Parallel-Clustering
 Analysis; 69. Exterior-Interior Panderivative Analysis, PS Model; 70.
 Pansystems Analysis of Axiomatic Systems; 71. Pansystems Ecological
 Analysis; 72. Pansystems Analysis of Generalized Traffic; 73. Pansys-
 tems Clustering-Discouple Characteristics of Architecture and City; 74.
 Equivalence Theory of Dynamics of Electromagnetic Media; 75. Pansys-
 tems Annotation Method; 76. Panderivative Method; 77. Creation
 Method; 78. The Pansystems View of Design, Design Method; 79. Sim-
 plification Method, Tolerance Method; 80. Extension-Variation Method;
 81. The Three Layer Method; 82. Epitome-Extended Embodiment
 Method; 83. Problem-Solving Method; 84. Panring Method; 85. Savour
 Method; 86. The Pansystems Methodology 100; 87. The Pansystems
 Theorems 100; 88. The Pansystems Pithy Formulae 100; 89. The Pan-

systems Views 100; 90. The Pansystems Models 100; 91. The Ontological View of Pansystems; 92. The Pansystems Views of Content and Form; 93. The Pansystems Views of Relativity and Absoluteness; 94. The Pansystems Views of Freedom and Necessity; 95. The Pansystems Views of Finiteness and Infinity; 96. The Pansystems Views of Time and Space; 97. The Pansystems Views of Particle and Wave; 98. Pansystems Indeterminacy; 99. The Pansystems View of Dimension; 100. Panequivalence Theorems of Electromagnetic Media; 101. MSP-Transforming Principles; 102. 《Approximation-Transforming Theory and Pansystems Concepts in Mathematics》; 103. 《Pansystems Methodology》; 104. 《The Pansystems View of the World》; 105.《 Pansystems Theory and Mathematical Methods》; 106. 《Pansystems: A Philosophy Unconforming to God's Model》; 107. Regret Principle, The 10 Principles; 108. The Pansystems View of Perfect Paradox – Seeking; 109. 《Pansystems: Regret Idioms 200》; 110. 《Pansystems: Regret Heroes 100》.
