# 编 者 说 明

农村固定观察点是根据中国农村改革的需要,在1984年开展的全国社会经济典型调查的基础上,经中共中央书记处同意,由原中共中央农村政策研究室、国务院农村发展研究中心建立起来的。它是一个在全国范围内按类型和抽样相结合选定村庄和农户并进行连续跟踪调查的系统。它的建立是为了向中央和各级党政部门提供中国农村微观经济运行的重要信息和基本数据,作为制订农业和农村政策的参考资料。

本书在采集了1986—1999年全国300多个农村固定观察点第一手调查数据资料的基础上,按全国、东、中、西部经济地带和农户收入分组(将全部调查农户按家庭人均收入由低到高排序,然后分为低收入、次低收入、中等收入、次高收入、高收入5个农户等份分组)、分年度汇总了主要调查数据。汇编集中反映了过去15年间,这些被跟踪调查的300多个村庄2万多农户的社会经济状况和发展进程。本次汇总用到的基础数据包括农户调查数据、村综合调查数据、牧户调查数据和牧(区)村综合调查数据。这些数据采取平时记账、年终集中汇总方式取得,具有较高的准确性。

需要说明的是农村固定观察点曾于1993年和1995年两次修改调查指标。1986—1991年采用的是第一套调查指标,1993年采用的是修改了的第二套调查指标,1995年至今采用的是经两次修改的第三套调查指标。后两套调查指标保留了第一套指标中大部分内容,并增加了部分反映当前农村社会、经济活动的新指标。读

者可以从本汇编分年度的汇总中看到指标的修改和变化。汇编不含1992年和1994年的汇总数据,这是因为这两年观察点系统因故未开展全国性的调查。

固定观察点调查的样本数在1991年之前保持在大约2.6万个农户,900个牧户,300个农区村,14个牧区村。1993年因调整有所减少。1995年之后基本保持在2.1万个农户,650个牧户,300个农区村,15个牧区村。根据连续跟踪调查的原则,各省(市、自治区)选定的观察村和观察户每年均不进行更换,但对个别消亡或迁移的户从同一村庄中选择条件类似的农户予以替代。

通过本数据汇编,公开向社会提供来自于农村和农户的第一手调查数据汇总资料,目的在于让更多关注中国农村、农业和农民问题的读者共享这些宝贵的数据资源,来认识和把握中国农村社会经济发展变化的一般规律和趋势,推动农村改革与发展的理论和政策研究。为了满足广大读者对各省(市、自治区)汇总数据的需求,今后我们将编辑出版本汇编的续集(省级数据汇编)。

由于原始资料的计量单位为亩、马力等非法定计量单位,在汇编时未换算。

本汇编的不妥之处,欢迎读者批评指正。

## Preface

To help evaluate the effectiveness of rural reforms of China, the Fixed Rural Observation Villages were established on the base of the national social and economic survey conducted in 1984 by the former Rural Policy Research Department of Central Committee of Chinese Communist Party and Research Center for Rural Development of State Council with the authorization by the Secretariat of Central Committee of Chinese Communist Party. The survey is a panel system of villages and rural households nationwide selected through combination of categorizing and sampling. Its function is to supply the important information and basic data on China's microeconomic performance to central government and administrative departments at various levels as a reference of agricultural and rural policy making.

The major data collection is based on the first hand data of more than 300 Fixed Rural Observation Villages from 1986—1999 and is aggregated annually according to the economic region of east, central and west as well as the national average, and to the rural households income in quintile. The survey reflects the social and economic development of more than 300 villages and more than 20 thousand rural households in the past 15 years. The survey includes data on rural households, comprehensive data on villages, as well as data on ranchers and pasturing villages. The collection has a considerably veracity with the data acquisition by keeping records daily and calculating year — end.

The survey indicators of the Fixed Rural Observation Villages were revised twice since 1986. The original indicators were adopted between 1986 and 1991, the first revised indicators were adopted in 1993 and the second revised indicators have been applied from 1995 up to date. The two revised indicators maintained the most parts of the original one and added

some new indicators on rural society and economic activities. Readers can tell the changes on the indicator adoption from the annual data collection. The survey was not conducted in years 1992 and 1994, so the data of these two years are excluded.

The sampled number of Fixed Rural Observation Villages in 1991 was set at about 26 thousand rural households, 900 rancher households, 300 farming villages and 14 pasturing villages. This quantity was reduced in 1993. Since 1995, the sampled number of Fixed Rural Observation Villages has been maintained basically at 21 thousand rural households, 650 rancher households, 300 farming villages and 15 pasturing villages. To generate a panel data survey, the selected villages and households in each province (municipality, autonomous region) does not change annually. However, the vanished and emigrated households can be replaced by the similar conditioned households in the same village, and can be identified in the data.

The purpose of publishing this first hand data of rural areas and rural households is to offer valuable information for people who pay attention to rural and agricultural issues in China and to better understand the development of China's rural economy. The survey data thus will promote the theoretical and policy study on rural reform and development. To satisfy the demand for data on provinces (municipalities and autonomous regions), we will continue to publish a book on the collection of provincial level data in future.

Your suggestions are welcome.
