Is your e-business walking a tightrope?

The power of the Pentium® III processor.

Your safety net in the Internet economy.

intel inside Pentium III

It's a fact. Doing business through the Internet exposes your company to viruses, unauthorized access, and potentially overwhelming network traffic loads. Your safety net? The Intel® Pentium® III processor. It has the power to run sophisticated compression, encryption and anti-virus software behind the scenes, without compromising performance. So you work faster and safer. And to add an even higher level of control, each processor can help to better identify and manage your vital assets. To learn more about the Pentium III processor, visit us on the Web, where you'll also find information on Intel products and the year 2000.* ► www.intel.com/PentiumIII

Rich, vibrant colors. That's just one way the Pentium® II processor helps enhance the experience of your Internet content, once it's downloaded to your PC. In fact, the Pentium II processor is engineered to deliver an array of performance improvements. With today's optimized software, you can see graphics in lifelike 3-D and experience smooth-running video. You'll also enjoy a leap in processing power that lets you get more out of today's multimedia applications—whether they're educational, entertainment or travel.
