ACKNOWLEDGEMENTS

Looking back and reflecting upon the development and the writing of this work, the grueling path toward completion was wrought with brambles, challenging me greatly and worrying me almost to no end. The experience though proved enlightening and very interesting, and gives me a great sense of achievement and satisfaction. The hardship and growth reminds me of the many wonderful people who helped and guided me along this path, who without their unconditional support and collaboration, this work would never be the same.

Firstly, I would like to thank and express my deepest gratitude to my dedicated supervisors, Associate Prof. Toshio Otsuki (大月敏雄) and Prof. Shuichi Matsumura (松村秀一). The work could not have been completed without their continuous support, guidance and deep trust in my ability. They have offered me valuable ideas, suggestions and constructive criticisms, allowing me to draw upon their profound knowledge in housing field and their rich research experience. They opened my eyes when I hit the dead end, and secured me when I overextended myself. They have always been generous with their time and attention, placing high priority on my research and always willing to discuss with me when they are available. I have learned a lot from them about not only work writing, but also professional ethics. I am quite honored to be under their supervision and am very much obliged for their efforts in helping me complete the work.

I am also extremely grateful to my deputy supervisors—Prof. Kazuhiko Nishide (西出和彦), Associate Prof. Kaori Fujita (藤田香織), and Associate Prof. Tsuyoshi Seike (清家剛), whose patience, meticulous guidance and invaluable suggestions were indispensable toward the completion of this work. They not only helped me in the details of my research, but also offered me a comfortable environment and sufficient resources to write the work. Special thanks also goes to Associate Prof. Tetsuo Kidokoro (城所哲夫) of the Department of Urban Engineering, as I found that after every discussion with him, my eyes and my mind became more open, especially in establishing the theoretical framework of my research. I certainly could not have made it without their support and encouragement.

In the area of public housing in Japan, I am deeply thankful to Mr. Masashi Mori (森正志) of the Ministry of Land, Infrastructure, Transport and Tourism, Mrs. Nobuyo Kimura (木村宣代), Mr. Tomoki Sera (瀬良智機), Mr. Kimitaka Yoshimura (吉村公孝) of the Bureau of Urban Development Tokyo Metropolitan Government, and Mr. Kou Yoshida (吉田宏) of PSATS. They not only assisted me in coordinating and arranging my interviews, but were also always accessible for my various requests. I will never forget the kindness of Mr. Kou Yoshida, a 70 years old gentleman, who brought academic books to my lab several times, even in bad health.

Furthermore, I wish to extend my thanks to the people in China whom I met during my survey—Mr. Sheng Chang (昌盛) of OCT Enterprises Co., Ltd., Mr. Kefang Sun (孙克放) of the Ministry of Housing and Urban-rural Development of People's Republic of China, Mr. Gang Duan (段刚) of the Bureau of Urban Planning of Changping, Mr. Huhai Wang (汪湖海) of the Bureau of Urban Planning of Qingdao Municipality, Mr. Zurong Dou (窦祖融) of China Vanke Co., Ltd., Prof. Yanmin Zhou (周燕珉) of Tsinghua University, and Mr. Lei Zhang (张磊) of Renmin University of China, as well as professors from my alma mater—Harbin Institute of Technology (HIT), Prof. Suning Xu (徐苏宁) and Prof. Guangjun Jin (金广军), who gave me countless important and pertinent information and suggestions. Their patience and kindness are greatly appreciated. Through their help and assistance, I was able to obtain a large amount of primary first-hand data which provided the empirical basis for this research.

Many thanks also go to several of my dear colleagues and friends—Hideaki Sumikura (角倉英明), a respected senior at the Matsumura Lab, who introduced me to many important Japanese scholars, always expressed interest and concern in my research; Tomoyuki Gondou (権藤智之), the senior as well, who always introduced me academic books correlated with my research and lent me them if he has got; my dear tutor Ayako Maeshima (前島彩子) who helped me a lot in my life all these 3 years in Japan; my dear lab-mates from both the former Matsumura & Fujita Lab and the current Nishide & Otsuki Lab, such as, Shiro Watanabe (渡邊史郎), Naoyuki Matsumoto (松本直之), and Yuna Wang (王玉娜), who showed great tolerance and encouraged me greatly during the most difficult time of my work writing, especially Bill Chang, Louis Huang, Yu Zhao (赵雨), who also helped me deal with interviews in

Japanese; my Malaysian friend, Aminuddin Baki, who helped me with the proof-reading of the whole work; my Japanese training volunteer, Kaoru Moteki (茂木カオル), who helped me fit in the Japanese environment more easily; my dear friends, among others, Ying Wang (王莹), and Ying Zhou (周英), who always encouraged me and accompanied besides me when I felt tired or depressed; and finally, my dear partner in the work writing, Ying-Chang Yu (游瑛樟), who accompanied me while we wrote our works, discussed, challenged and defended each other's research, encouraged each other during the 2011 earthquake and nuclear crisis, and supported each other toward the finish line. Their friendship provided me strength, and without their companionship, I would have perhaps lost my way in the darkness.

Last but not least, I would like to give special thanks and appreciation to the Chinese government who financed me all these 3 years, and my parents whose patience, belief and love enabled me to complete this work.

Zhi Qiu

TABLE OF CONTENTS

ACKNOWLEDGEMENTS	I
TABLE OF CONTENTS	V
LIST OF FIGURES.....	XIII
LIST OF TABLES.....	XVII
I RAISING THE ISSUE.....	1
CHAPTER 1 INTRODUCTION.....	3
1.1 RESEARCH BACKGROUND AND MOTIVATION	3
1.1.1 Housing problem of low income population in metropolitan in China.....	3
1.1.2 Housing security system in Japan from a vertical perspective.....	11
1.1.3 Transition of housing security in the US from a horizontal perspective	13
1.2 PURPOSE OF RESEARCH.....	17
1.2.1 Establishing the reference model for comparison.....	18
1.2.2 Identifying deficiencies and problem of current public housing supply system in China in comparison to that in Japan	19
1.2.3 Clarify public housing supply target for the low income population for further study	20
1.3 LITERATURE REVIEW	20
1.3.1 Study on housing policy system.....	20
1.3.2 Study on “Housing Poverty” problem.....	28
1.3.3 Study on housing security policy system	31
1.3.4 Study on public housing supply system	36
1.3.5 Study on specific public housing supply system	40
1.3.6 Position of the research in academic field.....	44
1.4 METHODOLOGY OF RESEARCH.....	47
1.4.1 Chapter 2—Selection of housing security instrument.....	47
1.4.2 Chapter 3—Selection of existing model of public housing supply as reference.....	47
1.4.3 Chapter 4—Establishment of public housing supply comparison model between Japan and China.....	48
1.4.4 Chapter 5—Comparison and reference of policy and institutional system.....	49
1.4.5 Chapter 6—Comparison and reference of housing construction method.....	49

1.4.6	Chapter 7—Reflection of the public housing security target.....	50
1.5	TERMINOLOGY	52
1.5.1	Household registration system in China.....	52
1.5.2	Terminology correlated with public housing	53
1.6	COMPOSITION OF RESEARCH	55
II	COMPARISON FOUNDATION	57
CHAPTER 2	COMPARISON OF HOUSING SECURITY INSTRUMENTS FOR LOW INCOME POPULATION IN COUNTRIES AROUND THE WORLD	59
2.1	CHAPTER INTRODUCTION	59
2.1.1	Collection of secondary and primary data.....	60
2.1.2	Original research idea.....	61
2.2	VERIFICATION OF COMPARABILITY OF HOUSING SECURITY INSTRUMENTS.....	62
2.2.1	Similarities: market economic operation mode	63
2.2.2	Differences in the specific category of market operation mode	65
2.2.3	Section summary.....	67
2.3	COMPARISON OF THE CORRELATED COMPONENTS: HOUSING SYSTEM.....	67
2.3.1	The US: Market-relief housing system.....	68
2.3.2	Sweden: Market-nationwide security housing system.....	69
2.3.3	Germany: Conservative corporatist welfare housing system	70
2.3.4	Singapore: government intervention housing system	72
2.4	COMPARISON OF THE CORRELATED COMPONENTS: LAND SYSTEM	74
2.4.1	Land tenure system	74
2.4.2	Land usage system	77
2.5	COMPARISON OF THE CORRELATED COMPONENTS: ECONOMIC DEVELOPMENT.....	78
2.5.1	Comparison of GDP	78
2.5.2	Comparison of per capita income	79
2.5.3	Comparison of GDP growth.....	80
2.5.4	Comparison of Engel Coefficient	82
2.6	COMPARISON OF HOUSING SECURITY INSTRUMENTS	83
2.6.1	Mortgage-interest deduction.....	85

5.7.2	Comparison of policy establishment institutional system	218
5.7.3	Application of "Intermediary Agency" in executive institutional system	219
5.7.4	Proposal of supervised institutional system in China	223
5.8	CHAPTER CONCLUSION	227
CHAPTER 6 COMPARISON OF PUBLIC HOUSING SUPPLY CAPACITY FROM THE PERSPECTIVE OF CONSTRUCTION BETWEEN JAPAN AND CHINA		231
6.1	CHAPTER INTRODUCTION	231

6.1.1	Collection of secondary data and primary data.....	231
6.1.2	Original research idea.....	233
6.2	OVERVIEW OF THE INDUSTRIALIZED CONSTRUCTION METHOD IN JAPAN	234
6.2.1	Concept of housing industrialization.....	234
6.2.2	Origin of housing industrialization in Japan.....	237
6.2.3	Characteristics of housing industrialization.....	239
6.3	OVERVIEW OF LABOR-INTENSIVE CONSTRUCTION METHOD IN CHINA.....	244
6.3.1	Cast-in site reinforced concrete construction.....	245
6.3.2	Possibility of popularizing Japan's housing industrialization in China.....	248
6.4	FEASIBILITY OF JAPAN'S HOUSING INDUSTRIALIZATION IN CHINA	251
6.4.1	Components correlated with popularization of Japan's industrialized construction method.....	251
6.4.2	Observation on the corresponding components in China to testify feasibility of Japan's housing industrialization	258
6.5	ARGUMENT ON REFERENCE METHOD OF JAPAN'S PUBLIC HOUSING STRUCTURAL SYSTEM AND CONSTRUCTION METHOD FOR CHINA	263
6.5.1	Overview of housing industrialization* in China	263
6.5.2	Comparison of public housing structural system and technique	268
6.5.3	Componentization and modularity of public housing construction	276
6.6	ARGUMENT ON REFERENCE METHOD OF JAPAN'S PUBLIC HOUSING STANDARDIZATION FOR CHINA.....	280
6.6.1	Regulations correlated with public housing standardization.....	280
6.6.2	Public housing standardized design in Japan	284
6.6.3	Public housing design in China.....	287
6.7	COMPARISON OF PUBLIC HOUSING STANDARDIZED DESIGN BY CASE STUDY	292
6.7.1	Position of the case study	292
6.7.2	Introduction of the "Vanhui Building" project.....	293
6.7.3	Comparison of housing standard within different dwelling layouts.....	296
6.7.4	Comparison of housing standard between VH and Japan's standardized public housing	299
6.8	CHAPTER CONCLUSION	308
CHAPTER 7 COMPARISON OF THE TARGET OF PUBLIC HOUSING		

	SUPPLY—LOW INCOME POPULATION IN METROPOLITAN AREAS IN JAPAN AND IN CHINA	311
7.1	CHAPTER INTRODUCTION	311
7.1.1	Collection of secondary data and primary data	313
7.1.2	Original research idea	313
7.1.3	Social survey of Beijing in China	314
7.2	REVIEW OF THE EXISTING CONCEPT OF LOW INCOME POPULATION	315
7.2.1	Academic interpretation in the world	315
7.2.2	Concept of low income population in Japan	317
7.2.3	Concept of low income population in China	318
7.2.4	Disadvantage of low income population concept based on income line	320
7.3	COMPARISON BETWEEN JAPAN AND CHINA 1: SPATIAL DISTRIBUTION AND RESIDENTIAL FORM OF LOW INCOME POPULATION	322
7.3.1	Spatial distribution and residential form of low income population in Japan	323
7.3.2	Spatial distribution and residential form of low income population in China	325
7.3.3	Comparative findings	335
7.4	COMPARISON BETWEEN JAPAN AND CHINA 2: PROPERTY OF THE LOW INCOME POPULATION	338
7.4.1	The property of low income population in Japan	338
7.4.2	The property of low income population in China	340
7.4.3	Comparative findings	347
7.5	COMPARISON BETWEEN JAPAN AND CHINA 3: RESIDENTIAL STATUS OF LOW INCOME POPULATION	352
7.5.1	The residential status of low income population in Japan	353
7.5.2	The residential status of low income population in China	354
7.5.3	Comparison findings	359
7.6	REFLECTION OF THE TARGET OF PUBLIC HOUSING SUPPLY IN CHINA	364
7.6.1	Principle components correlated with low income population in China	364
7.6.2	Re-orientation of public housing supply policy	370
7.6.3	Residential requirement for public housing construction	371
7.7	CHAPTER CONCLUSION	375
IV	CONCLUSION	379

CHAPTER 8 CONCLUSION.....	381
8.1 SUMMARY OF CHAPTER FINDINGS	381
8.1.1 Referenceability of Japan's public housing supply system for China.....	381
8.1.2 Discrepancy and problem of current public housing supply system in China by comparison with that in Japan	384
8.1.3 Clarification of public housing supply target—the low income population in China	388
8.2 FINAL CONCLUSION.....	390
8.2.1 Public housing supply system in Japan	391
8.2.2 Public housing supply system in China.....	394
8.2.3 Differences and similarities by comparison of public housing supply system of Japan and China	397
8.2.4 Reasons for the differences and similarities of public housing supply system between Japan and China.....	400
8.2.5 Recommendations for the public housing supply system in China	402
8.3 FUTURE STUDIES.....	404
8.3.1 Specific details under the orientation proposed in the book.....	404
8.3.2 Study on more countries similar with China.....	404
8.3.3 Internal mechanism of formulating public housing supply policy	405
