Preface (

卷首语

景观是人所向往的自然,景观设 计是制造更美好的自然环境。景观设 计师把景观作为表现与再现的对象; 建筑设计师把景观作为建筑物的配景 或背景; 生态学家把景观定义为生态 系统的还原; 旅游学家把景观当作资 源。而一个更文学和广泛的定义则是 "能用一个画面来展示,能在某一视 点上可以全览的景象。尤其是自然景 象。"

对于景观从业人员来说,设计的

最高境界就是"景观设计就像是在自 然中行走一样"。一个成功的作品来 之不易, 需要很多方面的共同合作, 如建设方、设计方、施工方以及与之 相关的各个方面的共同努力。好的景 观设计更是应该考虑现场环境和场地 所处的自然环境完美结合, 与场地的 特质相融合,回归到土地的本质,形 成"原来就有"的自然环境。再赋予 功能就可以称得上为"人性的场所, 白然的回归"。

本期新景观为前三期的进阶,共 收录三十多个项目,着重讲述的是 2011-2013年间公司优秀的景观规划 设计作品。所介绍的项目涵盖了多个 区域多种类型的景观设计项目, 从住 宅,到旅游规划,到公园绿地,再到 综合性景观设计等。以期引发同行业 者的思考、并对同行业者有所启迪。

> 编者 2014年初

Landscape is the nature that people long for. Landscape is to create a better natural environment. Landscape designers take landscape as a target of expressing and representation; Architects use landscape as the entourage or background; Ecologists define landscape as the restoration of ecosystem; Tourism researchers consider landscape as resources, but a more literary and broad definition is "It can be shown with a frame. It is an overview at a certain viewpoint, especially the overview of natural scene. "

For landscapers, the highest end is "Landscape design is like walking in the nature." The completing of a successful work calls for cooperation of design, construction, and all the other related sides. A delightful landscape design takes on-site surroundings and the natural environment into consideration and combines itself with site characteristics. It forms a landscape which is so natural that it looks it was there in the first place. This can be seen as the "a home of human nature and a return of self-recognition".

This volume of New Landscape is an upgrade version of the preview three. It contains more than 30 projects and focuses on the excellent works from 2011-2013 in the company. The introduced projects include landscape design of various areas and different kinds, say, residential projects, tourism planning, park landscape, comprehensive landscape design etc. It is hoped that it can inspire more landscape designers.

At the beginning of 2014
