# 前言

历年六级考试结果证明:要想考高分,必须做真题!

该书是在广泛征求多所高校六级强化班考生建议的基础上,通过我们在强化班教学的亲身体验而进行编写的。目前图书市场上大量的六级真题集,很多存在着答案错误、解析简单(根据原文轻松可知 A、B、D 是错的,因此 C 是对的)或冗长(如“该句的译文是”、“该题的答案是”等词语反复出现,浪费大量空间)等缺点。遇到疑难问题,则要查词典、问老师。不仅要花费很多时间与精力,还很难掌握考试规律。该书正弥补了这方面的不足,同时增加了六级解题技巧的精讲部分。

1. **题目**:收录了 2007 年 6 月到 2010 年 12 月的 8 套新题型六级实考试题(删除了 2007 年之前不考的老题型)。考生自测时每套试题须在 125 分钟内完成(相关听力材料可在作者博客链接中免费下载使用,减轻学生负担)。

2. **KEYS**:试卷后均有 KEYS,方便考生速查答案。

3. **难词脚注**:对试卷中的难词做了中文释意,并给出例句以便于掌握。

4. **精讲**:解释部分为该书最显著的特色。

(**Part I**)作文:给出思路点拨、范文及范文闪光点点拨,考生可熟悉行文套路,轻松面对六级作文。(Part III)听力理解:给出录音的书面材料,答题依据在文中用黑体标出,指导考生学会听前猜测与分析。(Part II)快速阅读、(Part IV)深度阅读、(Part V)完形填空三部分:①为便于考生理解原文,每篇均给出中文译文,主题或主题句均用黑体字注出。②选择项均用精练的语言给出答题依据,培养考生形成良好的定位阅读思维习惯。(Part VI)翻译:给出多种翻译方法与视角,辨析语法及固定搭配。

因此该书省去了考生查词典、问老师等不必要的麻烦。通过做题,掌握应试技巧,举一反三,每周 2~3 套真题,1 个月有效突破六级考试难关,轻轻松松提高英语水平。

该书有助于考生对六级考试做题技巧的突破,也适用于研究生入学、MBA、同等学力、雅思与新托福考试以及具有中级英语水平的学生自学考试使用,同时也可作为强化班教师教学参考使用。

本书的解释、译句、例句都是经过反复推敲、实践,但不当之处在所难免,敬请广大读者、同行、专家不吝指正,以便改进。

★ 欢迎本书读者光临“郑家顺英语博客”(http://blog.sina.com.cn/zhengjiashun)以及“中国英语考试网”(http://www.zgyksw.com 或 http://www.zhengjiashun.com)!

这里既有作者在教学中的心得体会,也有英语考前做题技巧分析以及最新试卷与答案;考前将不断更新六级信息,希望能对你的英语学习有所帮助;同时也希望能借此收到更多学习者的反馈与意见。让我们一起进步,谢谢参与。

### Seven Steps to a More Fulfilling Job

Many people today find themselves in unfulfilling work situations. In fact, one in four workers is dissatisfied with their current job, according to the recent "Plans for 2004" survey. Their career path may be financially rewarding, but it doesn't meet their emotional, social or creative needs. They're stuck, unhappy, and have no idea what to do about it, except move to another job.

Mary Lyn Miller, veteran career consultant and founder of the Life and Career Clinic, says that when most people are unhappy about their work, their first thought is to get a different job. Instead, Miller suggests looking at the possibility of a different life. Through her book, *8 Myths of Making a Living*, as well as workshops, seminars and personal coaching and consulting, she has helped thousands of dissatisfied workers reassess life and work.

Like the way of Zen, which includes understanding of oneself as one really is, Miller encourages job seekers and those dissatisfied with work or life to examine their beliefs about work and recognize that “in many cases your beliefs are what brought you to where you are today.” You may have been raised to think that women were best at nurturing and caring and, therefore, should be teachers and nurses. So that’s what you did. Or, perhaps you were brought up to believe that you should do what your father did, so you have taken over the family business, or become a dentist “just like dad.” If this sounds familiar, it’s probably time to look at the new possibilities for your future.

Miller developed a 7-step process to help potential job seekers assess their current situation and beliefs, identify their real passion, and start on a journey that allows them to pursue their passion through work.

### **Step 1: Willingness to do something different.**

Breaking the cycle of doing what you have always done is one of the most difficult tasks for job seekers. Many find it difficult to steer away from a career path or make a change, even if it doesn’t feel right. Miller urges job seekers to open their minds to other possibilities beyond what they are currently doing.

### **Step 2: Commitment to being who you are, not who or what someone wants you to be.**

Look at the gifts and talents you have and make a commitment to pursue those things that you love most. If you love the social aspects of your job, but are stuck inside an office or “chained to your desk” most of the time, vow to follow your instinct and investigate alternative careers and work that allow you more time to interact with others. Dawn worked as a manager for a large retail clothing store for several years. Though she had advanced within the company, she felt **frustrated**<sup>①</sup> and longed to be involved with nature and the outdoors. She decided to go to school nights and weekends to pursue her true passion by earning her master’s degree in forestry. She now works in the biotech forestry division of a major paper company.

### **Step 3: Self-definition**

Miller suggests that once job seekers know who they are, they need to know how to sell themselves. “In the job market, you are a product. And just like a product, you must know the features and benefits that you have to offer a potential client, or employer.” Examine the skills and knowledge that you have and identify how they can apply to your desired occupation. Your qualities will exhibit to employers why they should hire you over other candidates.

### **Step 4: Attain a level of self-honoring.**

Self-honoring or self-love may seem like an odd step for job hunters, but being able to accept yourself, without judgment, helps eliminate insecurities and will make you more self-assured. By accepting who you are—all your emotions, hopes and dreams, your personality, and your unique

---

① **frustrate** /'frʌstreɪt/ *vt.* 1. 使沮丧,使灰心: She was *frustrated* by the lack of appreciation shown of her work. 她因为工作得不到肯定而灰心丧气。 2. 挫败,使受挫折: Their attempts to speak to him were *frustrated* by the guards. 他们想找他谈话的企图因警卫的阻挡没有成功。

way of being—you'll project more confidence when networking and talking with potential employers. The power of self-honoring can help to break all the falsehoods you were programmed to believe—those that made you feel that you were not good enough, or strong enough, or intelligent enough to do what you truly desire.

### Step 5: Vision.

Miller suggests that job seekers develop a vision that embraces the answer to “What do I really want to do?” One should create a solid statement in a dozen or so sentences that describe in detail how they see their life related to work. For instance, the secretary who longs to be an actress describes a life that allows her to express her love of Shakespeare on stage. A real estate agent, attracted to his current job because he loves fixing up old homes, describes buying properties that need a little tender loving care to make them more saleable.

### Step 6: Appropriate risk.

Some philosophers believe that the way to enlightenment comes through facing obstacles and difficulties. Once people discover their **passion**②, many are too scared to do anything about it. Instead, they do nothing. With this step, job seekers should assess what they are willing to give up, or risk, in pursuit of their dream. For one working mom, that meant taking night classes to learn new computer-aided design skills, while still earning a salary and keeping her day job. For someone else, it may mean **quitting**③ his or her job, taking out loan and going back to school full time. You'll move one step closer to your ideal work life if you identify how much risk you are willing to take and the sacrifices you are willing to make.

### Step 7: Action.

Some teachers of philosophy describe action in this way, “If one wants to get to the top of a mountain, just sitting at the foot thinking about it will not bring one there. It is by making the effort of climbing up the mountain, step by step, that eventually the summit is reached.” All too often, it is the lack of action that ultimately holds people back from attaining their ideals. Creating a plan and taking it one step at a time can lead to new and different job opportunities. Job-hunting tasks gain added meaning as you sense their importance in your quest for a more meaningful work life. The plan can include researching industries and occupations, talking to people who are in your desired area of work, taking classes, or accepting volunteer work in your targeted field.

Each of these steps will lead you on a journey to a happier and more rewarding work life. After all, it is the journey, not the destination, that is most important.

② **passion** /'pæʃən/ *n.* 1. [C,U] 激情, 热情; She argued with great *passion*. 她争论时情绪激动。 2. [C] 酷爱; Music is a *passion* with him. 他酷爱音乐。

1. According to the recent "Plans for 2004" survey, most people are unhappy with their current jobs.
2. Mary Lyn Miller's job is to advise people on their life and career.
3. Mary Lyn Miller herself was once quite dissatisfied with her own work.
4. Many people find it difficult to make up their minds whether to change their career path.
5. According to Mary Lyn Miller, people considering changing their careers should commit themselves to the pursuit of \_\_\_\_\_.
6. In the job market, job seekers need to know how to sell themselves like \_\_\_\_\_.
7. During an interview with potential employers, self-honoring or self-love may help a job seeker to show \_\_\_\_\_.
8. Mary Lyn Miller suggests that a job seeker develop a vision that answers the question "\_\_\_\_\_".
9. Many people are too scared to pursue their dreams because they are unwilling to \_\_\_\_\_.
10. What ultimately holds people back from attaining their ideals is \_\_\_\_\_.

- C) Reduce their working-hours.                      D) Strengthen the government's role.

### Section C

**Directions:** In this section, you will hear a passage 3 times. When the passage is read for the first time, you should listen carefully for its general idea. When the passage is read for the second time, you are required to fill in the blanks numbered from 36 to 43 with the exact words you have just heard. For blanks numbered from 44 to 46 you are required to fill in the missing information. For these blanks, you can either use the exact words you have just heard or write down the main points in your own words. Finally, when the passage is read for the third time, you should check

what you have written.

Nursing, as a typically female profession, must deal constantly with the false impression that nurses are there to wait on the physician. As nurses, we are (36) \_\_\_\_\_ to provide nursing care only. We do not have any legal or moral (37) \_\_\_\_\_ to any physician. We provide health teaching, (38) \_\_\_\_\_ physical as well as emotional problems, (39) \_\_\_\_\_ patient-related services, and make all of our nursing decisions based upon what is best or suitable for the patient. If, in any (40) \_\_\_\_\_, we feel that a physician's order is (41) \_\_\_\_\_ or unsafe, we have a legal (42) \_\_\_\_\_ to question that order or refuse to carry it out.

Nursing is not a nine-to-five job with every weekend off. All nurses are aware of that before they enter the profession. The emotional and physical stress, however, that occurs due to odd working hours is a (43) \_\_\_\_\_ reason for a lot of the career dissatisfaction. (44) \_\_\_\_\_. That disturbs our personal lives, **disrupts**④ our sleeping and eating habits, and isolates us from everything except job-related friends and activities.

The quality of nursing care is being affected dramatically by these situations. (45) \_\_\_\_\_. Consumers of medically related services have evidently not been affected enough yet to demand changes in our medical system. But if trends continue as predicted, (46) \_\_\_\_\_.

## Part IV Reading Comprehension (Reading in Depth) (25 minutes)

### Section A

**Directions:** In this section, there is a short passage with 5 questions or incomplete statements. Read the passage carefully. Then answer the questions or complete the statements in the fewest possible words on **Answer Sheet 2**.

Questions 47 to 51 are based on the following passage.

Google is a world-famous company, with its headquarters in Mountain View, California. It was set up in a Silicon Valley **garage**⑤ in 1998, and *inflated* (膨胀) with the Internet bubble. Even when everything around it **collapsed**⑥ the company kept on inflating. Google's search engine is so widespread across the world that search became Google, and *google* became a verb. The world fell in love with the effective, fascinatingly fast technology.

Google owes much of its success to the brilliance of S. Brin and L. Page, but also to a series of fortunate events. It was Page who, at Stanford in 1996, initiated the academic project that

④**disrupt** /dis'rʌpt/ *vt.* 使中断, 扰乱: An accident has *disrupted* railway services into and out of the city. 一次事故使进出这座城市的铁路交通陷于混乱。

⑤**garage** /gə'reɪdʒ; 'gærɑ:dʒ/ *n.* [C] 1. 车库: a house with a built-in *garage* 附设汽车房的房子 2. 汽车修理行: My car is at the *garage*. 我的车在修理行。

⑥**collapse** /kə'læps/ *vi.* 1. 倒塌, 塌下: In these high winds, many of the huts are in danger of *collapsing*. 这么大的风, 许多简陋的小屋都面临倒塌的危险。 2. 崩溃, 突然失败: Their relationship has all but *collapsed* as a result of the affair. 经过这件事情他们之间的关系几乎完结。 *n.* 1. [U] 倒塌, 塌下: The storm caused the *collapse* of the roof. 暴风雨使屋顶塌了。 2. [sing., U] 崩溃, 突然失败: Our whole economic system was on the verge of *collapse*. 我们的整个经济体系濒临崩溃。

eventually became Google's search engine. Brin, who had met Page at a student **orientation**<sup>⑦</sup> a year earlier, joined the project early on. They were both Ph. D. candidates when they devised the search engine which was better than the rest and, without any marketing, spread by word of mouth from early adopters to, eventually, your grandmother.

Their breakthrough, simply put, was that when their search engine crawled the Web, it did more than just look for word matches; it also *tallied* (统计) and ranked a host of other critical factors like how websites link to one another. That delivered far better results than anything else. Brin and Page meant to name their creation Googol (the mathematical term for the number 1 followed by 100 zeroes), but someone misspelled the word so it stuck as Google. They raised money from *prescient* (有先见之明的) professors and venture capitalists, and moved off campus to turn Google into business. Perhaps their biggest stroke of luck came early on when they tried to sell their technology to other search engines, but no one met their price, and they built it up on their own.

The next breakthrough came in 2000, when Google figured out how to make money with its invention. It had lots of users, but almost no one was paying. The solution turned out to be advertising, and it's not an exaggeration to say that Google is now essentially an advertising company, given that that's the source of nearly all its revenue. Today it is a giant advertising company, worth \$ 100 billion.

47. Apart from a series of fortunate events, what is it that has made Google so successful? \_\_\_\_\_.
48. Google's search engine originated from \_\_\_\_\_ started by L. Page.
49. How did Google's search engine spread all over the world? \_\_\_\_\_.
50. Brin and Page decided to set up their own business because no one would \_\_\_\_\_.
51. The revenue of the Google company is largely generated from \_\_\_\_\_.

## Section B

**Directions:** There are 2 passages in this section. Each passage is followed by some questions or unfinished statements. For each of them there are four choices marked A), B), C) and D). You should decide on the best choice and mark the corresponding letter on **Answer Sheet 2** with a single line through the centre.

### Passage One

Questions 52 to 56 are based on the following passage.

You hear the refrain all the time: the U. S. economy looks good statistically, but it doesn't feel good. Why doesn't ever-greater wealth promote ever-greater happiness? It is a question that dates at least to the appearance in 1958 of *The Affluent* (富裕的) *Society* by John Kenneth Galbraith, who died recently at 97.

*The Affluent Society* is a modern classic because it helped define a new moment in the human

⑦ **orientation** /ˌɔːriən'teɪʃən/ *n.* [C, U] 1. 方向, 目标, 方位: The movement is liberal and social democratic in *orientation*. 这一运动的目标是自由和社会民主。 2. 熟悉情况, 适应, 情况介绍: There is a week of *orientation* for new students before each term. 每个学期开始之前都有一周时间向新生作情况介绍。

condition. For most of history, “hunger, sickness, and cold” threatened nearly everyone, Galbraith wrote. “Poverty was found everywhere in that world. Obviously it is not of ours.” After World War II, the dread of another Great Depression gave way to an economic **boom**®. In the 1930s unemployment had averaged 18.2 percent; in the 1950s it was 4.5 percent.

To Galbraith, materialism had gone mad and would breed discontent. Through advertising, companies conditioned consumers to buy things they didn’t really want or need. Because so much spending was artificial, it would be unfulfilling. Meanwhile, government spending that would make everyone better off was being cut down because people instinctively—and wrongly—labeled government only as “a necessary evil.”

It’s often said that only the rich are getting ahead; everyone else is standing still or falling behind. Well, there are many undeserving rich—overpaid chief executives, for instance. But over any meaningful period, most people’s incomes are increasing. From 1995 to 2004, inflation-adjusted average family income rose 14.3 percent, to \$43,200. People feel “**squeezed**®” because their rising incomes often don’t satisfy their rising wants—for bigger homes, more health care, more education, faster Internet connections.

The other great frustration is that it has not eliminated insecurity. People regard job stability as part of their standard of living. As corporate layoffs increased, that part has eroded. More workers fear they’ve become “the disposable American,” as Louis Uchitelle puts it in his book by the same name.

Because so much previous suffering and social conflict stemmed from poverty, the arrival of widespread affluence suggested *utopian* (乌托邦式的) possibilities. Up to a point, affluence succeeds. There is much less physical misery than before. People are better off. Unfortunately, affluence also creates new complaints and **contradictions**®.

Advanced societies need economic growth to satisfy the multiplying wants of their citizens. But the quest for growth lets loose new anxieties and economic conflicts that disturb the social order. Affluence liberates the individual, promising that everyone can choose a unique way to self-fulfillment. But the promise is so extravagant that it predestines many disappointments and sometimes inspires choices that have anti-social consequences, including family breakdown and *obesity* (肥胖症). Statistical indicators of happiness have not risen with incomes.

Should we be surprised? Not really. We’ve simply reaffirmed an old truth: the pursuit of

⑧**boom** /bu:m/ *n.* 1. [sing.] (营业等的)激增, (经济等的)繁荣, 迅速发展: a sudden boom in the housing market 房地产市场的火爆 2. 隆隆声, 嗡嗡声: The crash of the airplane made a deafening boom. 飞机坠毁时发出了震耳欲聋的响声。

### Passage Two

Questions 57 to 61 are based on the following passage.

The use of *deferential* (敬重的) language is symbolic of the Confucian ideal of the woman, which dominates conservative gender norms in Japan. This ideal presents a woman who withdraws quietly to the background, subordinating her life and needs to those of her family and its male head. She is a dutiful daughter, wife, and mother, master of the domestic arts. The typical refined Japanese woman excels in modesty and delicacy; she "treads *softly* (谨言慎行) in the world," elevating feminine beauty and grace to an art form.

Nowadays, it is commonly observed that young women are not conforming to the feminine *linguistic* (语言的) ideal. They are using fewer of the very deferential "women's" forms, and even using the few strong forms that are known as "men's." This, of course, attracts considerable attention and has led to an outcry in the Japanese media against the defeminization of women's language. Indeed, we didn't hear about "men's language" until people began to respond to girls' appropriation of forms normally reserved for boys and men. There is considerable sentiment about

the “corruption” of women’s language—which of course is viewed as part of the loss of feminine ideals and morality—and this sentiment is crystallized by nationwide opinion **polls**<sup>①</sup> that are regularly carried out by the media.

Yoshiko Matsumoto has argued that young women probably never used as many of the highly deferential forms as older women. This highly polite style is no doubt something that young women have been expected to “grow into”—after all, it is assign not simply of femininity, but of maturity and refinement, and its use could be taken to indicate a change in the nature of one’s social relations as well. One might well imagine little girls using exceedingly polite forms when playing house or imitating older women—in a fashion analogous to little girls’ use of a high-pitched voice to do “teacher talk” or “mother talk” in role play.

The fact that young Japanese women are using less deferential language is a sure sign of change—of social change and of linguistic change. But it is most certainly not a sign of the “masculinization” of girls. In some instances, it may be a sign that girls are making the same claim to authority as boys and men, but that is very different from saying that they are trying to be “masculine.” Katsue Reynolds has argued that girls nowadays are using more assertive language strategies in order to be able to compete with boys in schools and out. Social change also brings not simply different positions for women and girls, but different relations to life stages, and adolescent girls are participating in new subcultural forms. Thus what may, to an older speaker, seem like “masculine” speech may seem to an adolescent like “liberated” or “hip” speech.

57. The first paragraph describes in detail \_\_\_\_\_.

- A) They pay less attention to their linguistic behavior.
- B) They use fewer of the deferential linguistic forms.
- C) They confuse male and female forms of language.
- D) They employ very strong linguistic expressions.

59. How do some people react to women’s appropriation of men’s language forms as reported in the Japanese media?

- A) They call for a campaign to stop the defeminization.
- B) They see it as an expression of women’s sentiment.

① **poll** /pəʊl/ *n.* 1. [C] 民意测验: The teacher took a *poll* of the class to see who wanted to go on an excursion in the countryside. 老师对全班进行了一次民意测验, 以了解谁想去乡村远足。 2. Historically, humans get serious about avoiding disasters only after one has just struck them.

62 that logic, 2006 should have been a breakthrough year for rational behavior. With the memory of 9/11 still 63 in their minds, Americans watched hurricane Katrina, the most expensive disaster in U. S. history, on 64 TV. Anyone who didn't know it before should have learned that bad things can happen. And they are made 65 worse by our willful blindness to risk as much as our 66 to work together before everything goes to hell.

Granted, some amount of *delusion*(错觉) is probably part of the 67 condition. In A. D. 63, Pompeii was seriously damaged by an earthquake, and the locals immediately went to work 68, in the same spot—until they were buried altogether by a volcano eruption 16 years later. But a 69 of the past year in disaster history suggests that modern Americans are particularly bad at 70 themselves from guaranteed threats. We know more than we 71 did about the dangers we face. But it turns 72 that in times of crisis, our greatest enemy is 73 the storm, the quake or the 74 itself. More often, it is ourselves.

So what has happened in the year that 75 the disaster on the Gulf Coast? In New Orleans, the Army Corps of Engineers has worked day and night to rebuild the flood walls. They have got the walls to 76 they were before Katrina, more or less. That's not 77, we can now say with confidence. But it may be all 78 can be expected from one year of *hustle*(忙碌).

Meanwhile, New Orleans officials have crafted a plan to use buses and trains to 79 the sick and the disabled. The city estimates that 15,000 people will need a 80 out. However, state officials have not yet determined where these people will be taken. The 81 with neighboring communities are ongoing and difficult.
