Do you want to live a happier, less stressful (有压力的) life? Try laughing for no reason at all. That's how thousands of people start their day at Laughter Clubs around the world — and many doctors now think that having a good laugh might be one of the best ways to stay healthy.

The first Laughter Club was started in Mumbai, India, in 1995 by Dr Madan Kataria. "Young children laugh about 300 times a day. Adults laugh between 7 and 15 times a day," says Dr Kataria. "Everyone's naturally good at laughing — it's the universal language. We want people to feel happy with their lives." There are now more than 500 Laughter Clubs in India and over 1,300

I feel better!

worldwide.

Many doctors are also interested in the effects (效果) of laughter on our health. According to a 5-year study at the UCLA School of Medicine in California, with laughing there is less stress in the body. Laughter improves our health against illness by about 40%.

So, what happens at a Laughter Club? I went along to my nearest club in South London to find out. I was quite nervous at the beginning of the class, to be honest — I wasn't interested in laughing with a group of strangers, and I was worried about looking stupid. Our laughter teacher told us to clap our hands and say "ho ho ho, ha ha ha," while looking at each other. However, our bodies can't tell the difference between fake laughter and real laughter, so they still produce the same healthy effects.

Surprisingly, it works! After ten minutes everybody in the room was laughing for real — and some people just couldn't stop! At the end of the class I was surprised by how relaxed and comfortable I felt. So if you're under stress, then start laughing. You might be very pleased with the results!

- ( ) 48 In which country was the first Laughter Club started?  
A. Britain. B. America. C. Australia. D. India.
- ( ) 49 How did the writer feel at the beginning of the class?  
A. Surprised. B. Pleased. C. Nervous. D. Stressful.
- ( ) 50 When did the people in the club begin to laugh for real?  
A. After a few minutes. B. After a few hours.  
C. After a few seconds. D. After a few days.
- ( ) 51 Which of the following is true according to the passage?  
A. Fake laughter and real laughter are both good for health.  
B. 40% of the people in Laughter Clubs are good friends.  
C. Adults laugh more often than children in a day.  
D. Laughing is the best way to prevent illness.

### C

Each year Ben is glad when school is closed on Martin Luther King Jr. Day. Ben knows that this day honors an important man, but Ben does not feel connected to him. However, the *small-world theory* (理论) connects Ben to Dr. King. Ben's mom (0) has a close friend, Amy (1). Amy's uncle, Mark (2), once met and spoke to John Carter (3), the son of President Jimmy Carter (4). Jimmy Carter knew Dr. King (5). In a way, Ben is only "five people away" from Martin Luther King Jr.

The small-world theory says that everyone in the world is connected through a short chain (链条) of people they know. Another name of this chain is degrees of separation. Each degree is a step that separates a person from someone he or she does not know. There are zero degrees of separation between a person and the people he or she knows directly. This means that there are zero degrees between Ben and his mom. There is one degree of separation when just one person separates someone from a person he or she does not know. Ben knows his mom, but he hasn't met her close friend Amy. Therefore, Ben is one degree away from Amy. As the chain continues. Amy's uncle, Mark, is two degrees, John Carter is three degrees, and his father is four degrees. Dr. King is five degrees away from Ben. The theory says that there are no more than six degrees of separation between any two people in the world.

The small-world theory has a lot to do with math. The theory assumes (假定) that each person knows 100 people. Each one of those 100 people knows 50 different people. Each of those 50 people knows another 50 people, and so on. When someone continues the calculation to six degrees, it is like this:  $100 \times 50 \times 50 \times 50 \times 50 = 31.25 \times 10^9$ . This number is greater than 31 billion (a billion = a thousand million). There are over 6 billion people in the world. These numbers show it is possible that six degrees of separation could include everyone in the world.

Does the small-world theory work? No one has ever proved it. Maybe the theory just invites people to

think a little more about their places in the world.

( ) 52 Ben is two degrees away from \_\_\_\_\_.

A. Jimmy Carter

B. John Carter

C. Amy

D. Mark

( ) 53 What is the meaning of “degrees of separation” in Paragraph 2?

A. The chain to connect people.

B. The relations between people.

C. The steps of knowing strangers.

D. The separation between strangers.

( ) 54 What is the small-world theory mainly about?

A. How far Ben is away from Dr. King.

B. How many people one can get to know.

C. How people are connected in the world.

D. How the degrees of separation are set up.

( ) 55 We can learn from the article that \_\_\_\_\_.

A. the small-world theory works

B. more research is needed to prove the theory

C. six degrees are needed to know the strangers

D. the writer's purpose is to help people find out their places

### 四、阅读与表达(共 10 分,每小题 2 分)

阅读短文,根据其内容回答问题。

The Amazon rainforest is home to millions of different kinds of animals, plants, and birds. Most of the world's fresh water is here and the forest plants clean the Earth's air every day.

Chico was born near the Amazon town, Brazil, in 1944 and started working when he was very young. Like the rest of his family, the boy got the money by taking a little rubber from the trees in the forest. (The trees are not hurt when the rubber is taken.) The forest and its people lived together comfortably and peacefully.

But some people think too much about themselves and never think about the future. In 1980, the forest was burned to build roads, houses and factories. Chico was angry; he wanted to save the forest! He talked to the government workers, but they didn't listen to him. They were still clearing the rainforests to make quick, easy money. "Many voices are stronger than one," he thought, so Chico held group meetings. He discovered that hundreds of people agreed with him. His hope grew. More people came together to try to stop the work of the forest clearers. Large areas of the forest were saved. Later he traveled to many other countries for international help. People soon became very much interested in this brave Brazilian. In the next few years Chico's name became famous all over the world. The government of Brazil started making plans to protect large areas of the Amazon rainforest.

But as Chico's dreams started coming true, someone stopped him in the only possible way. The famous forest fighter was murdered right outside his home on December 22, 1988. Chico's life was cut short, but his brave new ideas continued in other people. One man changed the world's ideas. After his death, people around the world sent money to help Chico's work.

17 Was Chico born in Brazil?

18 How did young Chico get money?

19 How many things did Chico do after the forest was burned?

20 When was Chico murdered?

21 What did Chico achieve in his life?

#### 四、阅读理解(本大题共 10 小题,每小题 2 分,共 20 分)

阅读下面的短文,从每小题所给的 A、B、C 和 D 选项中选出一个最佳选项。

##### A

When I was 13 years old, a boy gave me an important gift. It was a smile.

It was the early autumn of my first year at a junior high school, and my old school was far away. As a result, no one knew who I was. I was very lonely, and afraid to make friends with anyone.

Every time I heard the other students talking and laughing, I felt my heart break. I couldn't talk to anyone about my problem, and I didn't want my parents to worry about me.

Then one day, my classmates talked happily with their friends, but I sat at my desk unhappily as usual. At that moment, a boy entered the classroom I didn't know who he was. He passed me and then turned back. He looked at me and, without a word, smiled.

Suddenly, I felt the touch of something bright and friendly. It made me feel happy, lively and warm.

That smile changed my life. I started to talk with the other students and made friends. Day by day, I became closer to everyone in my class. The boy with the lucky smile has become my best friend now.

One day, I asked him why he smiled, but he couldn't remember smiling at me!

It doesn't matter because all the dark days have gone. Now I believe that the world is what you think it is. If you think you are lonely, you might always be alone. So smile at the world and it will smile back.

- ( ) **56** Why was the smile an important gift?  
 A. Because the writer's old school was far away.  
 B. Because the writer didn't know who the boy was.  
 C. Because the smile didn't mean anything to the boy.  
 D. Because it made the writer feel happy, lively and warm.
- ( ) **57** The writer couldn't talk to anyone in her new school about her problem because  
 A. she was always unhappy  
 B. she didn't have any friends there  
 C. she was in the first year at a junior high school  
 D. she didn't want her parents to worry about her
- ( ) **58** How did the smile change her life?  
 A. She started to make friends.  
 B. She became best friends with the boy.  
 C. Her parents didn't worry about her any more.

- D. She realized that she was lonely.
- ( ) 59 Where does she now think her feeling of unhappiness came from?
- A. From her old school. B. From her parents.
- C. From herself. D. From her classmates at the new school.

# B

When we ask students what they would like to be, they often talk about usual jobs, things like doctors or teachers. But if you think about it, many people don't plan to do their jobs. They just start doing them by accident. We have talked to two people with unusual jobs.

Emily is a dentist but she doesn't work with people. She works with horses. After university, she took care of animals' medical health for several years, but she noticed that there were few people who could help with horses' teeth. She decided to go back to college and study again. Then she had to buy special tools, but she's never out of work. She's always very busy taking care of horses' teeth. "I couldn't be a dentist for people now," Emily said, "because I really enjoy working with horses."

As soon as David could read, he read books about robots. But the robots he builds today don't look like the strange robot people in his books. He builds robots for industry. Early on he made up his mind to study science, maths and computers so that he could break into the world of robot engineering. "Some of the maths is very difficult," says David, "but you must study maths to be an engineer." Fortunately, he got top marks in all his maths exams.

- ( ) 60 Emily doesn't want to be a dentist for people because \_\_\_\_\_.
- A. the pay is low B. she has to buy special tools

# C

We all dream though we remember only a few of our dreams. Some people train themselves to remember their dreams. As soon as they wake up, they record what their dreams were about.

Scientists believe that we have different kinds of sleep. One kind of sleep is called R. E. M. sleep. R. E. M. stands for Rapid (快速的) Eye Movement. During this kind of sleep our eyes move quickly, even though they are closed. Although we are asleep, there is a lot of brain (头脑) activities, and we probably have strong dreams at this time.

Sometimes people talk in their sleep. In these dreams the dreamer is usually unhappy or worried about something. The worst of these dreams are so frightening that we call them nightmares. In a nightmare we often dream that we are being chased (追赶) or that we are trapped in some way.

Scientists and others have written books about the meanings of dreams. The most famous of these scientists was Sigmund Freud who wrote over a hundred years ago. He suggested different meanings to certain kinds of dreams. It is possible, however, that every dream has a special meaning only for the person who dreams it, and that this meaning is about something in that person's life.

- ( ) 63 How can we tell if someone is having an R. E. M. dream?
- A. They're talking in their sleep. B. They're worried about something.
- C. Their eyes are moving quickly. D. Their eyes are moving slowly.
