PREFACE

Grammar being a generalization of usage, a grammar book introducing both grammar and usage will especially be useful to students of English who desire improvement in their studies. The verb is the most important part of, and hence the key to, English grammar, because it gives shape to the sentence and yet its grammar and usage is comparatively complicated. It should therefore be mastered before everything else in grammar. This book is designed to provide information in this respect as a book of study for undergraduates and postgraduates and one of reference for junior teachers. The information supplied may still be fundamental, but the book does impart some basic knowledge of materials which are generally useful, and which may help to understand passages to be found in original works of grammar by Western authors when reference to these is required.

By way of acknowledgement, the compiler must mention the following works, from which he has often obtained suggestive ideas and drawn useful materials in compiling the present book:

- C.E. Eckersley and J.M. Eckersley (1961): A Comprehensive English Grammar for Foreign Students
- A.S. Hornby (1957): A Guide to Patterns and Usage in English
- John Millington-Ward (1955): The Use of Tenses in English

Frederick T. Wood (1973): English Verbal Idioms
 Frederick T. Wood (1962): Current English Usage
 Randolph Quirk, Sidney Greenbaum, Geoffrey Leech and
 Jan Svartvik (1973): A Grammar of Contemporary
 English
 Geoffrey Leech and Jan Svartvik (1974): A Communicative
 Grammar of English
 H.W. Fowler (1965): A Dictionary of Modern English
 Usage
 H.W. Fowler and F.G. Fowler (1930): The King's English
 J.C. Nesfield (1929): Idiom, Grammar & Synthesis for High
 Schools, Book IV
 W. McMordie (1957): English Idioms and How to Use
 Them

The compiler has also had the pleasure of referring to the
 following productions in Chinese by domestic writers of grammar,
 the titles in English being original ones except that of the first
 book, which is a translation by the compiler:

Zhang Dao Zhen (张道真) (1962): Practical English Gram-
 mar (Revised Edition)
 Bao Bing (薄冰) (1977): A Handbook of English Grammar
 (Revised Edition)
 The Foreign Languages Department of Xiamen University
 (1978): A New Elementary English Grammar

CONTENTS

(Headings in parentheses do not appear in the text; they serve only to indicate the contents concerned.)

Preface	ix
Introduction	1
Chapter I. Five Types of The English Verb	6
I. The Intransitive Type	6
II. The Linking Verb Type (Various Predicatives)	7
III. The Mono-transitive Type (Various Objects)	10
IV. The Di-transitive Type	13
(a) Convertible into Mono-transitive with "to"	14
(b) Convertible into Mono-transitive with "for"	14
(c) Not very well Convertible into Mono-transitive	15
V. The Complex Transitive Type	15
(a) With a Noun (or Noun-equivalent) Complement	16
(b) With an Adjective (or Adjective-equivalent) Complement	17
(1) to show result	17
(2) to show state	17
(3) a past participle to show passive meaning	18
(c) With a Verbal Complement to Indicate Action	18
(1) the infinitive with "to"	18
(2) the infinitive without "to"	19
(3) the present participle	20
(4) either the present participle or bare infinitive without appreciable difference of meaning	20

(5) either the present participle or infinitive with clear distinction of meaning	21
(6) the infinitive "to be"	22
(7) the preparatory "it" and complement	23
Chapter II. Tense	25
(The Sixteen Tense Forms)	25
(Dynamic Verbs and State Verbs)	27
I. Basic Use or Meaning of Each of the Tenses	28
II. Extended Use or Uses of the More Common Tense Forms	34
A. The Simple Present Tense	34
B. The Present Progressive Tense	38
C. The Present Perfect Tense.....	38
D. The Present Perfect Progressive Tense	39
E. The Past Tense Forms	40
F. The Simple Future Tense	41
G. The Future Progressive Tense.....	42
H. The Future Perfect Tense	42
I. The Past Simple Future Tense with "Would"	43
J. The Past Future Perfect Tense	43
III. Time and Tense	43
A. Denotation of Present Time	43
B. Denotation of Habitual, Permanent or Repeated Action	44
C. Denotation of Past Time	45
D. Denotation of Future Time	46
E. Denotation of Duration of an Action or of Absence of an Action Beginning in the Past and Continuing to the Present (Possibly to the Future)	47
IV. Comparison Between Some of the Common Tenses	47

Chapter III. Special or Anomalous Verbs50

I. What Special Verbs Are

(Notional Verbs, Auxiliary Verbs, Modal Verbs
and Non-special Verbs)

(Outstanding Feature of a Special Verb)

Other Peculiarities:50

A. Ability to Form the Tag Question52

B. Ability to Form Short Answers53

C. Ability to Form Elliptical Sentences55

D. Ability to Form an Emphatic Affirmative56

E. A Mid-position Adverb to Follow Rather
than Precede the Special56

F. With Most Specials, No Inflexion for the
Third Person Singular of the Present Tense57

II. Special or Non-special?57

A. "Need"57

B. "Dare"59

C. "Used to"59

D. "Have" and "have to"60

E. "Do"62

III. Mood, Emotion and Attitude62

A. Requests, Commands, Prohibitions,
Invitations, Suggestions62

B. Promises, Threats and Refusals63

C. Wishes and Preferences64

D. Plans and Arrangements or Decisions64

E. Obligation and Necessity65

F. Permission66

G. Probability and Likelihood66

H. Possibility68

I. Ability and Achievement70

J. Determination and Resolve; Willingness71

K. Concession	72
L. Surprise	73
M. Characteristic Behaviour	73
IV. Semi-modal Verbs	74
Chapter IV. Voice	76
(The Passive Form of the Verb)	76
(Passive Counterparts of the Three Types of Transitive Verbs: the Retained Object and the Subject Complement)	78
(The Conversion of Voice in Sentences with an Object "that" Clause).....	78
(Voice of Prepositional Verbs)	80
(Voice of Adverbial Verbs)	81
(Voice of Compound Prepositional Verbs)	82
(Voice of Transitive Prepositional Verbs)	83
(Passive Voice Emphasizes the Object, while Active Voice Emphasizes the Subject)	84
A. Examples Showing Transitive or Prepositional Verbs Which as a Rule Do not Occur in the Passive	86
B. Examples Showing Inconvertibility of an Idiom an Active Transitive Verb Has Entered into	86
C. Examples Showing Those Transitive Verbs Which Are Mostly, or Can Often Be, Used in the Passive	87
D. Verbs, Active in Form but Passive in Meaning	90
(A) Intransitive and Linking Verbs	90
(B) Transitive Verbs	90
(a) Finite Verbs	90
(b) Non-finite Verbs	91
(1) A Transitive Gerund	91
(2) A Transitive or Prepositional-Verb Infinitive	91

Chapter V. Mood	93
(The Indicative Mood, the Imperative Mood, and the Subjunctive Mood)	93
I. The Imperative Mood	93
II. The Subjunctive Mood	95
A. General	95
B. The Subjunctive Present Tense	98
C. Meaning of Subjunctive Mood	100
(The Subjunctive Mood as Popularly Called Divisible into:)	100
(A) The Pure Subjunctive	101
(B) The Half Subjunctive	103
(C) The Old-styled Subjunctive Present Tense	105
(D) The False Subjunctive	105
D. Subjunctive or Indicative?	107
(A Few Practical Situations Enumerated and Contrasted)	107
E. Conditions Expressed by Inversion	111
F. Conclusion	112
Chapter VI. The Non-finites	113
I. The Finite Verb versus the Non-finite	113
II. Agent of the Non-finite	116
III. Contrasts Between the Non-finites	119
A. As Subject	119
B. As Predicative	120
C. As Object	123
(A) of a Transitive Verb	123
(B) of a Preposition	123
D. As Attributive	124
(A) Transitive Present Participle versus Transitive Past Participle	124
(B) Intransitive Present Participle versus Intransitive Past Participle as Premodifier...	125

(C) Present Participle versus Gerund as Premodifier	126
(D) Present Participle versus Infinitive	127
(E) Infinitive versus Gerund or Preposition plus Gerund	129
E. As Adverbial	130
(A) The Participle and the Infinitive	130
(B) "Go" plus Infinitive versus "Go" plus Present Participle	133
F. Non-finites as Object Complements	134
(Object Complement Following Verb "Have") ...	134
G. Non-finites as Independent Elements (Disjuncts)	135
IV. Voice of the Non-finites	137
V. The Tense Forms of the Non-finites	138
A. of the Predicative Infinitive	139
B. of the-Complement Infinitive	139
C. of the Adverbial Participle	140
VI. The Adverbial Non-finite and the Adverbial Clause ...	141
(Absolute Construction of the Participle)	141
(Dangling Participle, Legitimate and Illegitimate)	142
(Dangling Gerund and Dangling Adverbial Infinitive, Legitimate and Illegitimate)	144
VII. The Non-finite Postmodifier and the Relative Clause	146
A. The Present Participial Phrase	146
B. The Past Participial Phrase	147
C. The Infinitive Phrase	148
VIII. The Split Infinitive	149
IX. The Bare Infinitive	150
A. As Complement to Certain Verbs	150

B. As Predicative	152
C. After Modal Verbs	152
D. After Certain Prepositions	152
X. The Elliptical Infinitive	153
XI. The Half Gerund	154
XII. Verbal Construction after "Rather than" and "As well as"	157
Chapter VII. Verbs and Their Prepositions	160
(General Remarks)	160
A. Intransitive Verbs Followed by Prepositions	163
(A) Omission of Preposition from Prepositional Verb Governing "that" Clause	163
(B) Cases Where Omission of Preposition Produces No Difference in Meaning	165
(C) Cases Where Omission of Preposition Will Produce a Difference in Meaning	165
(D) Cases Where a Different Preposition Gives a Different Meaning to Verb	169
(E) Cases Where a Different Preposition Gives No Appreciable Difference of Meaning to Verb	173
(F) Intransitive Verbs with Double Prepositional Phrases	174
B. Transitive Verbs Followed by Prepositions	175
(A) Mono-transitive Preposition Combinations Which Admit of Object Shuffling	175
(B) Mono-transitive Preposition Combinations Which Are Liable to Abuses of Object Shuffling	176
(C) Cases Where a Different Preposition Gives a Different Meaning to the Situation	177
(a) with Verbs in the Active Voice	177
(b) with Verbs in the Passive Voice	178

(D) A Few Cases Where Mono-transitive Preposition Combinations May Become Other Mono- transitive or Di-transitive Constructions by Dropping the Preposition	180
(E) Great Majority of Mono-transitive Preposition Constructions Are Fixed and Invariable	180
(F) A Few Reflexive Mono-transitive Preposition Constructions, Which Are Fixed and Invariable	181
C. The Verb "to be" Followed by Prepositions	181
(A) "To be at" with Phrases	182
(B) "To be in" with Phrases	183
(C) "To be on" with Phrases	183
(D) "To be out of" with Phrases	184
(E) Miscellaneous "To be plus Preposition" Phrases	184
D. Conclusion	186

INTRODUCTION

Language is a process of usage, which is changing forever. It is the work of usage. Grammar generalizes usage by deducing some rules, which are meant not to prescribe, but to guide. Where usage predominates, grammar complies. When usage changes, grammar is revised to account for the new usage. Grammar is thus not a set of dead rules, but merely some temporary guiding principles, which are to be valid for the time being. In the short run, therefore, grammar does serve to teach one how to write and speak conformably to usage. The compiler is ever of opinion that grammar should be taught with especial reference to usage.

It is the verb that forms the frame of an English sentence. The verb is the most important part of English grammar. And existing books on grammar do devote a considerable portion of space to its treatment. The grammar about the English verb usually covers such topics as kinds of verbs, tense, mood, voice and the non-finites. Of course, there is nothing wrong with the inclusion, but the way of treatment remains to be improved upon. The chief weakness common to many grammar books lies perhaps in the fact that too little emphasis has been laid on usage.

With the little experience accumulated in teaching English for years, the compiler is now able to present this book for the guidance of students of English. It is true that except for the addition of a final chapter "Verbs and Their Prepositions", the

book apparently contains the same topics as any other grammar book does in the section on the verb. Yet grammar is treated here side by side with usage, which can thus be kept in view amidst grammatical rules. One can find a wealth of reliable information here most readily.

A brief introduction to the ways of treatment adopted in each chapter is given below.

Current grammar books do touch upon the transitive verb, the intransitive verb and the linking verb, but with rather insufficient reference to the direct object, the indirect object and the object complement. These are treated rather briefly without due regard to usage. But they are points where usage counts so much. As a matter of fact, there are five basic types of the English verb, which determine the five basic types of the sentence. The importance of the types cannot, therefore, be over-emphasized. In this book, the types are set out by ample examples in logical order and treated in detail with reference to usage.

In the chapter on tense, special emphasis is laid on the distinction between time and tense — a point often passed over in grammar books. Time is something of the objective world, and we have the present time, the past time and the future time. Tense is a grammatical term, the various tense forms being used to refer to certain different times. Each tense form is given its basic meaning first so as to show why it has been so called, and then its extended meaning or meanings. Next, a time standard is put up, and different tense forms that may apply to it are enumerated and discussed with reference to it. Finally, different tense forms are compared again in sentences of similar wording to show different situations. The purpose of repetitive treat-

ment is to drive home the use of a tense form.

Most books treat the auxiliary verbs, modal verbs and the notional verbs "be" and "have" separately. They are closely related, though. They are all special (or, anomalous) verbs; they have one thing in common, i.e., being special in forming the negative and the interrogative and in some other minor respects. It is all usage. In this book they are treated as one single group—special verbs—and their common peculiarities are illustrated extensively. As modal verbs express the emotions or moods of the speaker, they are treated not one by one, but under a certain typical emotion, which will be shown to be often expressible by more than one modal. A discussion is also made of what are called semi-modal verbs.

Many grammar books deal with the passive voice rather mechanically. They teach more about the conversion (from active into passive, and *vice versa*) than about the usage. Now, the passive sentence and the active sentence are not exactly of the same meaning. In the passive, the original object has become the subject and is therefore more emphatic and important than the original subject. The relative importance of the subject and the object determines the use of the one or the other voice. This is why some verbs particularly lend themselves to the passive and others always demand the active. In this book, ample examples are supplied both ways. Besides, verbs which are active in form but passive in meaning, either in the finites or in the non-finites, are also pointed out and illustrated. As to the conversion itself, it is not limited to transitive verbs only, but the illustration goes on to phrasal verbs as well. Besides, all kinds of objects including the noun clause are taken care of in conversion.

The subjunctive mood has been dealt with rather unsatisfactorily in many grammar books. A definition is usually given first, and followed up by a miscellany of illustrations many of which do not bear out the definition. What is more, use of modal verbs is wrongly regarded as the subjunctive mood. So the description is bound to be confusing. The compiler has analysed the situation and tried to clarify the point by classifying the so-called subjunctive mood of that nature into four types (the pure subjunctive, the half subjunctive, the old-styled subjunctive and the false subjunctive) by way of illustration as well as comment.

The non-finites are treated in grammar books one by one. But since all of them may take up the position of a sentence element with a fixed grammatical function, it is advisable to compare them together under each particular function (say, adverbial, attributive, subject or object). This is what has been done by the compiler in the present book. It is also important to set out the differences between the finite and the non-finite. Other points are featured too, such as agent reference, time reference, voice reference, the peculiarity of the attributive and the predicative present participle, the peculiarity of the intransitive past participle, the relation with the adverbial clause, the relation with the relative clause, the split infinitive, the bare infinitive, the elliptical infinitive, the half gerund—most of which have been so meagrely described, if at all, in other books on grammar.

Prepositions constitute a separate chapter in a general grammar book and are usually treated there one by one. But since the verb has usually a great deal to do with the preposition, a book on the grammar and usage of the English verb, such as the
