中国医院建设

RECONSTRUCTION OF CHINESE HOSPITALS

(五)

科学技术文献出版社

前 言

建国以来，我国的医疗卫生事业取得了很大的成就，在防病治病、保障人民身体健康，保证社会主义建设事业顺利进行等方面作出了巨大贡献。党的十一届三中全会以后，医院建设进入了一个高速发展时期。

目前，正在全国进行的医院分级管理和医院评审工作，是我国医院管理体制的一项重大改革，它对于促进医院的基础建设、技术建设和医德医风建设，提高医疗质量，促进医院向更高层次发展都有极其重要的意义。它标志着我国医院建设和管理正逐步走上标准化、规范化、科学化的轨道，中国医院建设事业正步入一个崭新的发展时期。

为向国内外全面、翔实、系统地宣传我国医疗卫生事业取得的成就，交流各医院建设及管理经验，卫生部医政司组织编辑出版了《中国医院建设》大型画册，该画册收录三级医院为主，兼有突出的二级和一级医院。这些具有代表性的医院，可以反映我国医院建设的新姿，广大医院管理者和医务工作人员艰苦创业的精神风貌和光辉业绩。

这本画册的出版将是有关人士研究我国医院发展的可靠资料，是向广大医院管理者传播医院建设、管理经验的良好媒体，是国外同行了解中国医院建设的一个窗口，是广大人民群众寻医问药的指南，也是医院树立自身形象的载体。

该书的编辑得到了各省（市）自治区卫生厅（局）医政处及各有关医院和人士的大力支持，我们在此一并表示衷心的感谢。此画册涉足全国，时间仓促，难免有错和不尽人意之处，欢迎指正。

Preface

China's medical and health services have made great achievements since the founding of the People's Republic of China, which have made great contributions to prevention of diseases and to medical treatment and health care of the people, thus guaranteeing the smooth development of socialist construction. Moreover, since the Third Plenary Session of the Eleventh Congress of the Chinese Communist Party, hospital reconstruction has entered into a high-speed development stage.

At present, China is now in the midst of the work for grading management, assessment and examination of hospital, which is an important reform in management system of hospitals in China. It plays an important role in promoting basic construction of hospitals; in improving medical techniques of hospitals; in carrying out good medical style and morality of hospitals; in raising the medical levels and qualities of hospitals. It marks the new higher-level development stage of medical and health work in which China's hospital reconstruction and management has stepped into the orbit of standardization, specification, and science.

For the sake of introducing the great achievements in China's medical and health work to the readers both at home and abroad and exchanging the experiences concerning reconstruction and management of hospital in China, on the basis of complete, detailed and systematic information, under the leadership of Medical Administration Department of Ministry of Public Health, we have compiled this book entitled "China's Hospital Reconstruction". This book has collected large amount of information concerning most Grade-3 hospitals and some remarkable Grade-2 and Grade-1 hospitals across the land. These typical hospitals have reflected the new look of China's hospital reconstruction, the working-hard and initiating spirits of the broad Chinese medical workers and managers in hospital across the land, as well as the brilliant achievements in medical front.

This book, after its publication, will provide research people with reliable information on China's hospital development, which is a good medium to make broad hospital managers know the things about management experiences and reconstruction of hospitals in China; which is a window for the same-line workers abroad to get a peep of and learn about China's hospital reconstruction; which is a guide for the broad masses to have access to medical treatment and drugs as well as medicines; which is also a carrier for each hospital to show its self-image.

We are deeply indebted to the help and support of the medical and health departments concerned from various provinces (municipalities), Autonomous Regions, the Medical Administration Department of Ministry of Public Health, as well as the people who have contributed to the publication of this book.

Since this book deals with many hospitals across the land and we have spent limited time in compiling this book, there must be room for correction and improvement. All the comments from readers are always appreciated.
