前 言

一、本书编辑目的与作用

伴随我国市场经济体制的建立与完善,农村经济运行市场化步伐加快,市场机制在农产品流通与贸易中的基础作用日益显现,宏观决策和社会公众对农产品价格信息的需求与日俱增。为了适应这一新的形势,国家统计局农村社会经济调查系统发挥自身优势,逐步建立起完整的农产品价格调查体系,对农产品生产和流通全过程进行密集跟踪调查,全方位把握农产品价格走势,深入透视农产品生产、贸易和消费环节的分配关系和利益格局。汇编这些价格数据的目的是为了充分发挥农产品价格信息在分析研究我国农产品供给与需求、农产品市场竞争与产业结构调整、农民收入与居民消费等方面的独特作用,更好地服务于各级党政领导的“三农”决策,服务于关注农产品价格问题的研究机构和各界社会公众。

二、本书编辑的主要内容与资料调查方法

本书的内容主要包括我国农产品生产价格、集贸市场价格、批发市场价格信息三部分。农产品生产价格是农产品生产者农户和农场直接出售其产品时实际获得的单位产品价格,它是农产品集贸市场价格、批发价格和消费价格形成的基础和前提。农产品生产价格调查采用随机抽样的方法抽选调查网点,实行抽样调查。全国共抽选31000个农业生产经营单位,其中农户占90.5%,农场占9.5%。调查内容涉及农林牧渔四个大类,十五个中类三十个小类600种农产品。农产品集贸市场价格调查是对全国200个农产品主产县(市)36种农产品进行的集贸市场价格调查,旨在反映我国农产品主产区大宗农产品的交易价格和价格走势。批发市场价格调查对全国100家大中型农产品批发市场150种农产品进行的批发价格调查,旨在收集批发价格资料,准

确把握全国主要农产品价格走势和供求状况。

三、特别说明

本书在重点收录2007年农产品价格调查资料的同时,编发了2000年以来全国主要农产品的价格数据。生产价格指数以上年或上年同期价格为100。农产品集贸市场价格单位统一为元/公斤,价格数据保留两位小数;集贸市场价格走势分为环比和同比两个系列,环比以上月或上季度价格为100,同比以上年同月或同期价格为100。

为了及时反映全国农产品价格走势,我们将定期出版《中国农产品价格调查年鉴》。限于我们的经验和水平,书中疏漏在所难免,不妥之处敬请读者批评指正。

Preface

I. The Purpose of Editing This Book and the Role It Plays

Along with the establishment and improvement of the system of market economy in China, the marketization of the rural economic performance has been accelerated, the fundamental role of market mechanism has increasingly manifested itself in the circulation and trade of agricultural products. In the meanwhile, the government and the general public increasingly demand more for the information on the prices of agricultural products with each passing day, so as to meet the needs of macro-economic decision-making and to satisfy public concern.

In light of this new situation, the rural socio-economic survey system of the National Bureau of Statistics has brought its advantages to gradually set up an integral system of the survey of the prices of agricultural products, so as to monitor the whole process of the production and circulation of the agricultural products, to outline the changing trend of the prices of agricultural products in an all-round way, and to thoroughly understand the distribution relations and interest pattern among the production, trade and consumption links. The purpose of compiling these price data is to bring the unique role of the information on the prices of agricultural products into full play in analyzing and studying a few issues such as the supply and demand relations of the agricultural products, the market competition of agricultural products and the readjustment of industrial structure, the income and consumption of rural residents. It is expected, thereby, to better serve the leaders of the communist party and governments at different levels for decision-making on the issues of agriculture, rural areas and farmers, and to better serve the research institutes and the public of different circles, which pay close attention to the issues of the prices of agricultural products.

II. The Main Contents of This Book and the Survey Methods

The content of this book includes mainly the following three parts: (1) the producer prices, (2) the prices of the agricultural products at the country fairs in China, (3) the prices of agricultural products at the wholesale markets. The producer price of the agricultural prod-

uct is the unit price at which the producer, i.e. the rural household or the farm, directly sells the product. The producer prices of agricultural products are the bases for the formation of the prices at the country fairs as well as the wholesale prices and consumer prices. The survey of the producer prices of agricultural products is a sample survey. A total number of 31000 units engaged in agricultural production and management have been randomly selected in the whole country, in which the agricultural households account for 90.5% and the farms account for 9.5%. The content of the survey covers 600 products in the four categories of farming, forestry, animal husbandry and fishery, 15 divisions, and 30 groups. The survey of the prices at the country fairs covers 36 agricultural products in 200 major producing counties and cities. It is conducted for the purpose of reflecting the trading prices of the staple agricultural products in the major producing areas and the changing trend of these prices. The survey of the prices at the wholesale markets covers 150 agricultural products at 100 large and medium sized wholesale markets all over the country. It is conducted to reflect the trend of the prices of the main agricultural products at the wholesale markets and the relationship between supply of and demand for such products.

III. Special Notes

While mainly collecting the survey data on the prices of agricultural products for 2007, this book also includes the data on the prices of main agricultural products in China since 2000. The producer price indices take the prices in the previous year or the prices in the same period of the previous year as 100. The unit of the prices of agricultural products at country fairs is unified to be yuan/kg and two decimals are kept for the price data. Both chain indices and the fixed base indices are produced reflect the trend of the prices of agricultural products at country fairs. The chain indices take the prices of the previous month or quarter as 100 while the fixed base indices take the prices of the same month or same period in the previous year as 100.

In order to timely reflect the changing trend of the prices of agricultural products in China, we will publish the *China Yearbook of Agricultural Price Survey*. Due to limited experiences and knowledge, there may be some oversights and omissions in the book. We warmly welcome the comments or criticism from our readers.
