序言

随着公共景观设计在世界的复苏以及人们日愈增强的意识，公共景观设计的重要性在政府的大力宣传以及支持下显得尤为突出。通过设计公共景观，城市环境得到提升，城市的身份也得以在公众面前建立，而且城市街道的形象会得到提高。注重功能性，安全性，美学功能的公共景观不仅可以促进一个城市的发展，还可以提高城市居民的生活水平。因此，公共景观设计并非只是针对一个人或是一圈人，而是适用于所有的人。

景观不仅存在公共环境中，而且建筑本身也是景观。随着人们对生活环境以及水平的要求日愈变高，人们更希望看到一些新鲜的独特的景观。本套书除了囊括国内外知名的公共景观设计，还包括各种独特的建筑景观。例如挪威 Ornesvingen 观景台，不仅拥有优美的建筑结构，而且将周围的环境映衬的更加壮丽，吸引了很多来自全世界的游客。

在城市中，街道起着决定性的作用。从当初的交通运输作用，现在的街道具有全面，强大的作用。而人们也希望穿梭于舒适，功能齐全，美观的街道。这样一来，街道设施，如：座椅，自行车停放架，候车亭，照明设施等等都有了新的角色去扮演。

公共景观设计要求公共景观和设计二者和谐统一。同时，公共空间中的设施也需要合理设计与安排。

本套书共有三册，每册书各有重点，特色。形象的图标带来更加直接，丰富的信息。第一册是“公共景观”，主要包括国内外知名的广场，公园和游乐场设计。第二册是“建筑景观”，主要包括以下三个类别：建筑造型和建筑结构，观景台，标识。创意的建筑造型和建筑结构，总能带给人新鲜的感觉。大胆的观景台设计，不仅吸引着游客，而且值得人们参考设计。极具功能作用的标识设计，形象而直接。第三册是“街道设施”，主要包括：座椅，自行车停放架，候车亭，照明设施，自动饮水器，垃圾桶和树木防护装置。这些街道设施不仅覆盖面广，而且具有强大的功能性，更加美化了城市街道。

这套书在一个更高的层次上来诠释良好公共环境的形成，可以提高人们的生活水平。特别是随着城市环境数字化的加强，舒服的公共空间设计和便利的公共设施让人们的生活变得越来越高效和充满活力。

Preface

With the revitalization of public environment design in cities around the world, as also the increased recognition of citizens, the importance of public design has emerged for the construction of a guideline which is maintained and managed by government integratively. Through the improvement for city environment by public design, the establishment of city's own identity and the creation of street image in a view of pedestrian is to get higher. A quality of a city is reflected by functionality, safety and aesthetics simultaneously. Therefore, the meaning of public environment design is not for some unique, specific or a minor group, but for several people to use or see for the creation of beautiful city landscape, which also means a design for all kind of people.

Landscape not only exists in the public environment, and the architecture itself can also be a landscape. With people's increasingly high requirement of living environment and living level, people prefer to see some fresh and unique landscape. In addition to including well-known public landscape designs, this book also includes a variety of unique architectural landscapes. For example, Norway Ornesvingen viewing platform not only has a beautiful architectural structure, but also makes the surrounding environment more spectacular, and attracts a lot of tourists from all over the world.

In a city, the street plays a decisive role. From the start, the street was just used for transportation. However, the street now has a comprehensive and powerful role. At the same time, people want to walk through a comfortable, functional and beautiful street. As a result, street furniture, such as bench, bicycle rack, bus shelter, lighting facilities, etc., have a new role to play.

The public landscape design requires public landscape and design to be of harmony and unity. At the same time, the facilities in the public space need reasonable designs and arrangements.

This book contains three volumes, each with unique focus and feature. The icon images bring more direct and rich information. Volume 1, named "Public Landscape", includes famous squares, parks and playgrounds design from all over the world. Volume 2 is "Architectural Landscape", mainly including the following three categories: Architectural Formative Arts and Structure, Observation Platform, Signage. Innovative architectural formative arts and structure always give people a fresh feeling. The bold observation platform design not only attracts tourists, but also is worth referencing. The signage is functional, image and direct. Volume 3, "Street Furniture", includes Bench, Bicycle Rack, Bus Shelters, Lighting, Drinking Fountain, Trash and Trees Protective Device. These street facilities not only cover a lot, and with powerful features, make the city streets more beautiful.

The purpose of this book is to design a book with applied examples of the amenity elements in the street furniture and to accomplish the public facilities on a higher level as one of the design method to upgrade the quality of citizens' lifestyle in the city environments. Especially with the stress of digital city environments development, comfortable public space and street furniture make citizens' lifestyle more energetic and effective.
