Note

1. The returns included in this book embrace the foreign trade of Manchou-tikuo through in all the Customs Districts in the Empire. As far as these returns are concerned the Kwantung Leased Territory is treated as constituting an integral part of Manchou-tikuo.
2. Italic figures appearing in various tables of the returns for imports denote the amounts or values of commodities sent from the Kwantung Leased Territory across its frontier into Manchoukuo and represent real imports into Manchoukuo of foreign goods as well as products raised or manufactured in the Kwantung Leased Territory.
3. Consequent upon the introduction of the Customs Bonding Law from the 1st month of the 4th Year of K'angto (January, 1937) several special statistical tables are being added beginning from the present issue, in order to show the movements of cargo under bond within the territory of Manchou-kuo. Foreign goods under bond are not deemed as properly imported until they are removed from the bonded area (i. e., Bonded Warehouses, Sheds, etc.) for importation, and then, they are shown as imports included in the General Import Tables.
4. The unit of values used in all the returns is Manchoukuo Yuan.
5. The classification and order of commodities of imports and exports, as a general rule, follow those of the Customs Tariffs except in a few exceptions in which divergence from the general rule were necessary for statistical convenience.
