## Head and Neck

### Top 100 Diagnoses

---

The diagnoses in this book are divided into 15 sections in the following order:

**CPA-IAC**

**Skull Base**

**Temporal Bone**

**Orbit**

**Nose & Sinus**

**Pharyngeal Mucosal Space**

**Lymph Nodes**

**Larynx**

**Oral Cavity**

**Masticator Space**

**Parotid Space**

**Carotid Space**

**Midline Spaces**

**Visceral Space**

**Pediatric Lesions**

# Preface

The **PocketRadiologist™** series is an innovative, quick reference designed to deliver succinct, up-to-date information to practicing professionals “at the point of service.” As close as your pocket, world-renowned authors write each title in the series. These experts have designated the “top 100” diagnoses or interventional procedures in every major body area, bulleted the most essential facts, and offered high-resolution imaging to illustrate each topic. Selected references are included for further review. Full color anatomic-pathologic computer graphics model many of the actual diseases.

Each **PocketRadiologist™** title follows an identical format. The same information is in the same place - every time - and takes you quickly from key facts to imaging findings, differential diagnosis, pathology, pathophysiology, and relevant clinical information. The interventional modules give you the essentials and “how-tos” of important procedures, including pre- and post-procedure checklists, common problems and complications.

**PocketRadiologist™** titles are available in both print and hand-held PDA formats. Currently available modules feature Brain, Head and Neck, Orthopaedic (Musculoskeletal) Imaging, Pediatrics, Spine, Chest, Cardiac, Vascular, Abdominal Imaging and Interventional Radiology. 2003 topics that will round out the PocketRadiologist™ series include Obstetrics, Gynecologic Imaging, Breast, Temporal Bone, Pediatric Neuroradiology and Emergency Imaging.

# Table of Diagnoses

## CPA-IAC

Epidermoid Cyst, CPA .....	1
<i>H Ric Harnsberger MD</i>	
Arachnoid Cyst, CPA.....	4
<i>H Ric Harnsberger MD</i>	
Aneurysm, CPA.....	7
<i>H Ric Harnsberger MD</i>	
Acoustic Schwannoma .....	10
<i>H Ric Harnsberger MD</i>	
Meningioma, CPA .....	13
<i>H Ric Harnsberger MD</i>	

## Skull Base

Anterior Neuropore Anomalies .....	16
<i>H Ric Harnsberger MD</i>	
Clival Chordoma .....	19
<i>H Ric Harnsberger MD</i>	
Chondrosarcoma, Skull Base .....	22
<i>H Ric Harnsberger MD</i>	
Paraganglioma, Jugular Foramen.....	25
<i>H Ric Harnsberger MD</i>	
Schwannoma, Jugular Foramen.....	28
<i>H Ric Harnsberger MD</i>	
Meningioma, Jugular Foramen .....	31
<i>H Ric Harnsberger MD</i>	
Fibrous Dysplasia, Skull Base.....	34
<i>H Ric Harnsberger MD</i>	

## Temporal Bone

EAC Atresia .....	37
<i>Patricia A Hudgins MD</i>	
Cholesteatoma, Congenital .....	40
<i>Patricia A Hudgins MD</i>	
Cholesteatoma, Acquired .....	43
<i>Patricia A Hudgins MD</i>	
Aberrant Internal Carotid Art. ....	46
<i>H Ric Harnsberger MD</i>	
Glomus Tympanicum .....	49
<i>H Ric Harnsberger MD</i>	
Cochlear Dysplasia .....	52
<i>H Ric Harnsberger MD</i>	
Labyrinthine Ossificans .....	55
<i>H Ric Harnsberger MD</i>	
Inner Ear Schwannoma.....	58
<i>H Ric Harnsberger MD</i>	

Endolymphatic Sac Tumor .....	61
<i>H Ric Harnsberger MD</i>	
Fenestral Otosclerosis .....	64
<i>H Ric Harnsberger MD</i>	
Cochlear Otosclerosis .....	67
<i>H Ric Harnsberger MD</i>	
Large Endolymphatic Sac Anomaly .....	70
<i>H Ric Harnsberger MD</i>	
Apical Petrositis .....	73
<i>H Ric Harnsberger MD</i>	
Trapped Fluid, Petrous Apex .....	76
<i>H Ric Harnsberger MD</i>	
Cholesterol Granuloma, ME .....	79
<i>H Ric Harnsberger MD</i>	
Cholesterol Granuloma, PA .....	82
<i>H Ric Harnsberger MD</i>	
Hemangioma, Facial Nerve .....	85
<i>H Ric Harnsberger MD</i>	
Bell's Palsy .....	88
<i>H Ric Harnsberger MD</i>	
Facial Nerve Schwannoma .....	91
<i>H Ric Harnsberger MD</i>	

## **Orbit**

Orbital Dermoid .....	94
<i>H Christian Davidson MD</i>	
Orbital Cavernous Hemangioma .....	97
<i>H Christian Davidson MD</i>	
Orbital Capillary Hemangioma .....	100
<i>H Christian Davidson MD</i>	
Orbital Lymphangioma .....	103
<i>Richard H Wiggins III MD</i>	
Orbital Subperiosteal Abscess .....	106
<i>Karen L Salzman MD</i>	
Optic Neuritis .....	109
<i>Karen L Salzman MD</i>	
Idiopathic Orbital Pseudotumor .....	112
<i>Anne G Osborn MD</i>	
Thyroid Ophthalmopathy .....	115
<i>H Christian Davidson MD</i>	
Optic Nerve Meningioma .....	118
<i>H Christian Davidson MD</i>	
Retinoblastoma .....	121
<i>H Christian Davidson MD</i>	
Optic Nerve Glioma .....	124
<i>H Christian Davidson MD</i>	

## **Nose & Sinus**

Non-Invasive Fungal Sinusitis .....	127
<i>H Ric Harnsberger MD</i>	
Antrochoanal Polyp .....	130
<i>H Ric Harnsberger MD</i>	
Paranasal Sinuses Mucocoele .....	133
<i>H Ric Harnsberger MD</i>	
Sinonasal Polyposis .....	136
<i>H Ric Harnsberger MD</i>	
Wegener's Granulomatosis .....	139
<i>H Ric Harnsberger MD</i>	
Ossifying Fibroma .....	142
<i>H Ric Harnsberger MD</i>	
Juvenile Angiofibroma .....	145
<i>Patricia A Hudgins MD</i>	
Inverted Papilloma .....	148
<i>H Ric Harnsberger MD</i>	
Paranasal Sinus Osteoma .....	151
<i>H Ric Harnsberger MD</i>	
Esthesioneuroblastoma .....	154
<i>H Ric Harnsberger MD</i>	
Paranasal Sinus SCCa .....	157
<i>H Ric Harnsberger MD</i>	

## **Pharyngeal Mucosal Space**

Nasopharyngeal Carcinoma .....	160
<i>Richard H Wiggins III MD</i>	
Oropharyngeal SCCa .....	163
<i>Richard H Wiggins III MD</i>	
Tornwaldt's Cyst .....	166
<i>Richard H Wiggins III MD</i>	
Tonsillar Abscess .....	169
<i>H Ric Harnsberger MD</i>	
Minor Salivary Gland Ca .....	172
<i>H Ric Harnsberger MD</i>	
Non-Hodgkin Lymphoma, Tonsils .....	175
<i>H Ric Harnsberger MD</i>	
Benign Mixed Tumor, Pharynx.....	178
<i>H Ric Harnsberger MD</i>	

## **Lymph Nodes**

Nodal Squamous Cell Carcinoma .....	181
<i>Richard H Wiggins III MD</i>	
Nodal Lymphoma .....	184
<i>Richard H Wiggins III MD</i>	
Spinal Accessory Nodal Mets.....	187
<i>H Ric Harnsberger MD</i>	

## **Larynx**

Supraglottic SCCa .....	190
<i>Richard H Wiggins III MD</i>	
Glottic SCCa.....	193
<i>Richard H Wiggins III MD</i>	
Subglottic SCCa .....	196
<i>Richard H Wiggins III MD</i>	
Hypopharynx SCCa .....	199
<i>Richard H Wiggins III MD</i>	
Laryngocele .....	202
<i>H Ric Harnsberger MD</i>	

## **Oral Cavity**

Oral Cavity SCCa .....	205
<i>Richard H Wiggins III MD</i>	
Sublingual Space Abscess .....	208
<i>H Ric Harnsberger MD</i>	
Submandibular Sialadenitis .....	211
<i>H Ric Harnsberger MD</i>	
Ranula .....	214
<i>H Ric Harnsberger MD</i>	
Submandibular Gland BMT .....	217
<i>H Ric Harnsberger MD</i>	
Submandibular Gland Carcinoma.....	220
<i>H Ric Harnsberger MD</i>	
Ameloblastoma.....	223
<i>H Ric Harnsberger MD</i>	

## **Masticator Space**

Masticator Space Abscess.....	226
<i>H Ric Harnsberger MD</i>	
Sarcoma of Masticator Space .....	229
<i>H Ric Harnsberger MD</i>	

## **Parotid Space**

Benign Lymphoepithelial Lesions .....	232
<i>H Ric Harnsberger MD</i>	
Sjogren's Syndrome .....	235
<i>H Ric Harnsberger MD</i>	
Benign Mixed Tumor, PS .....	238
<i>H Ric Harnsberger MD</i>	
Warthin's Tumor, Parotid Space .....	241
<i>H Ric Harnsberger MD</i>	
MECa & ACCa, Parotid Space .....	244
<i>H Ric Harnsberger MD</i>	
Parotid Nodal Malignancy .....	247
<i>H Ric Harnsberger MD</i>	

## **Carotid Space**

Jugular Vein Thrombosis .....	250
<i>H Ric Harnsberger MD</i>	
Glomus Vagale Paraganglioma .....	253
<i>H Ric Harnsberger MD</i>	
Carotid Body Paraganglioma .....	256
<i>H Ric Harnsberger MD</i>	
Vagal Schwannoma, Carotid Space .....	259
<i>H Ric Harnsberger MD</i>	

## **Midline Spaces**

Retropharyngeal Space Abscess .....	262
<i>H Ric Harnsberger MD</i>	
RPS Nodal Malignancy .....	265
<i>H Ric Harnsberger MD</i>	
Prevertebral Abscess .....	268
<i>H Ric Harnsberger MD</i>	
Prevertebral Metastases .....	271
<i>H Ric Harnsberger MD</i>	

## **Visceral Space**

Multinodular Goiter .....	274
<i>H Ric Harnsberger MD</i>	
Differentiated Thyroid Carcinoma .....	277
<i>H Ric Harnsberger MD</i>	
Anaplastic Thyroid Carcinoma .....	280
<i>H Ric Harnsberger MD</i>	

## **Pediatric Lesions**

First Branchial Cleft Cyst .....	283
<i>Patricia A Hudgins MD</i>	
Second Branchial Cleft Cyst .....	286
<i>Patricia A Hudgins MD</i>	
Thyroglossal Duct Cyst .....	289
<i>Patricia A Hudgins MD</i>	
Cystic Hygroma .....	292
<i>Patricia A Hudgins MD</i>	
Cervical Thymic Cyst .....	295
<i>Patricia A Hudgins MD</i>	
Rhabdomyosarcoma .....	298
<i>Karen L Salzman MD</i>	

## Epidermoid Cyst, CPA

*CPA cistern epidermoid cyst. Graphic of epidermoid cyst of the CPA cistern illustrates the "bed of pearls" seen by the surgeon. The tendency of this lesion to engulf the cisternal portions of cranial nerves VII and VIII is depicted.*

### Key Facts

- Synonyms: Epidermoid tumor; non-neoplastic inclusion cyst
- Definition: Congenital lesion that arises from inclusion of ectodermal epithelial elements at the time of neural tube closure during the 3<sup>rd</sup> to 5<sup>th</sup> week of embryonic life, resulting in migration abnormalities of epiblastic cells
- Classic imaging appearance: Signal shows an **insinuating cisternal lesion** with low T1, high T2 close to that of CSF
  - FLAIR shows incomplete or absent attenuation
  - Diffusion-weighted imaging shows epidermoid cyst (EpC) has restricted diffusion (high-signal lesion)
- Other key facts
  - 3<sup>rd</sup> most common CPA-IAC mass
  - 1% of all intracranial tumors

### Imaging Findings

#### General Imaging Features

- Best imaging clue: Cisternal insinuation
  - Engulfs cranial nerves and vessels
- Mass **insinuates** into cisterns, engulfs cranial nerves and vessels
- Margins usually scalloped or irregular

#### CT Findings

- Resembles CSF on NECT scans
- Calcification in 20%
- No enhancement is rule; sometimes margin of cyst minimally enhances
- "Dense epidermoid" = rare variant

#### MR Findings

- Signal close to CSF on all standard MR sequences
  - T1 low, T2 high signal
  - T1 C+ images show EpC **does not enhance**
- "Dirty CSF" = MR description

## Epidermoid Cyst, CPA

Axial MR images through the low CPA cistern. T2 (A), T1 C+ (B), FLAIR (C) and diffusion (D) sequences are shown. High T2 signal, non-attenuation on FLAIR and diffusion restriction (high lesion signal in D) is characteristic of EpC. Insinuating margins and thin rim enhancement (arrow in B) also typical.

- FLAIR/CISS and diffusion MR are diagnostic
  - Does not null on FLAIR or CISS
  - High signal on diffusion scans (restricted diffusion)
- "White EpC" (high signal on T1) rare

### Imaging Recommendations

- Begin with routine enhanced MR imaging
- FLAIR and diffusion sequences added to confirm diagnosis
- Follow-up imaging looking for recurrence must include FLAIR and diffusion sequences

## Differential Diagnosis: Cystic CPA Mass

### Arachnoid Cyst

- Pushes broadly on adjacent structures, does not insinuate
- Attenuates on FLAIR sequence
- Shows no restriction on diffusion weighted imaging

### Benign Cystic Neoplasm

- Cystic meningioma and schwannoma will show some areas of enhancement on T1 C+ MR

### Malignant Cystic Neoplasm

- Ependymoma and astrocytoma pedunculate from brainstem and 4<sup>th</sup> ventricle respectively
- Will show some foci of enhancement on T1 C+ MR

## Pathology

### General

- Etiology-Pathogenesis
  - From inclusion of **ectodermal elements** during neural tube closure
- Epidemiology

# Epidermoid Cyst, CPA

---

- Posterior fossa most common site
- CPA 75%, 4th ventricle 25%

## Gross Pathologic, Surgical Features

- Pearly white, "the beautiful tumor"
- Lobulated, cauliflower-shaped surface features
- Insinuating growth pattern in cisterns, engulfs vessels and nerves

## Microscopic Features

- Cyst wall: Simple stratified cuboidal squamous epithelium
- Cyst contents: Solid crystalline cholesterol, keratinaceous debris
  - Does not contain hair follicles, sebaceous glands or fat in contrast to dermoid
- Grows in successive layers by desquamation from the cyst wall

## **Clinical Issues**

### Presentation

- Principal presenting symptom: Dizziness
- Broad presentation from 20 to 70: Peak age = 40
- Other symptoms: Depend on location, growth pattern
  - Headache
  - Trigeminal neuralgia (tic douloureux)
  - Facial neuralgia (hemifacial spasm)
  - Sensorineural hearing loss

### Natural History

- Grows slowly, remains clinically silent for many years

### Treatment

- Complete surgical removal is goal
- If recurs, takes many years to grow

### Prognosis

- Smaller cisternal lesions are readily cured with surgery
- Larger lesions where upward supratentorial herniation has occurred are more difficult to completely remove

## **Selected References**

1. Dechambre S et al: Diffusion-weighted MRI postoperative assessment of an epidermoid tumor in the cerebellopontine angle. *Neuroradiology* 41:829-31, 1999
2. Ikushima I et al: MR of epidermoids with a variety of pulse sequences. *AJNR* 18:1359-63, 1997
3. Gao P et al: Epidermoid tumor of the cerebellopontine angle. *RadioGraphics* 13:863-72, 1992

## Arachnoid Cyst, CPA

*Drawing of arachnoid cyst in the CPA cistern. The translucent cyst in this case is shown displacing the 7<sup>th</sup> and 8<sup>th</sup> cranial nerves. In most cases, the AC is an incidental finding unrelated to the patient's symptoms. The insert in the left lower quadrant shows an AC (arrow) on axial T2-FSE MR image.*

### Key Facts

- Synonyms: Primary or congenital arachnoid cyst (AC)
- Definition: Arachnoid or collagen-lined cavities that do not communicate directly with the ventricular system or the subarachnoid space
- Classic imaging appearance: Cystic cisternal mass with almost imperceptible walls with CSF density (CT) or intensity (MR)
- Split arachnoid contains CSF
- 10% of all AC occur in posterior fossa
  - CPA = Most common infratentorial site
- Often an incidental finding on MR imaging of the brain

### Imaging Findings

#### General Imaging Features

- Best imaging clue: **Complete fluid attenuation** (low signal) on FLAIR MR imaging with **no diffusion restriction** on diffusion sequence
- Resembles CSF in density (CT) and signal intensity (MR)
- Focal lesion that pushes cisternal structures but does not insinuate
- Sharply demarcated round or ovoid lesion

#### CT Findings

- Density same as CSF
- Higher density from hemorrhage or proteinaceous fluid rare
- No enhancement of cavity or wall
- Rarely causes pressure erosion of adjacent bone

#### MR Findings

- Signal parallels CSF on all sequences
- Suppresses completely (low signal) with FLAIR
- No restriction (low signal) on diffusion MR

## Arachnoid Cyst, CPA

CPA arachnoid cyst. Axial T2 (A), T1 C+ (B), FLAIR (C) and diffusion (D) sequences are shown. High signal AC on T2 image (arrow in A) does not enhance (B). Low signal on FLAIR sequence (C) indicates fluid attenuation has occurred. No diffusion restriction is seen as low signal on the diffusion sequence (D).

### Differential Diagnosis: Cystic CPA Mass

#### Epidermoid Cyst

- Shows restriction (high signal) on diffusion MR
- Insinuates adjacent CSF spaces and structures

#### Cystic Neoplasm

- Cystic meningioma, schwannoma, ependymoma, astrocytoma all will show some foci of enhancement on T1 C+ MR

#### Neurenteric Cyst

- Very rare lesion
- Often contains proteinaceous fluid (high-signal on T1 MR sequences)

### Pathology

#### General

- Etiology-Pathogenesis
  - Embryonic meninges fail to merge
  - Noncommunicating fluid compartment surrounded by arachnoid is formed that contains CSF
- Epidemiology
  - Accounts for 1% of intracranial masses

#### Gross Pathology, Surgical Features

- Fluid-containing cyst with translucent membrane
- May displace but does not engulf adjacent vessels or cranial nerves

#### Microscopic Features

- Thin wall of flattened but normal arachnoid cells
- No inflammation or neoplastic change
