Twenty-five years later, another professor read about the earlier study. He told his students to find out what had happened to these boys. Of the 200 boys, 20 had moved away or died. Nobody knew what had happened to them. They tried very hard and found the other 180 people. Among them 176 had become successful(**成功的**)as doctors, teachers and scientists.

The professor was very surprised and decided to study it further. Luckily, all the men were living near the place and he was able to ask each one, "What made you successful**？**" Each one answered with feeling, "There was a teacher".

The teacher was still living there, so the professor found her and asked the old woman what she had used to pull those boys out of the slums, and change them into successful people.
