图画议论文：

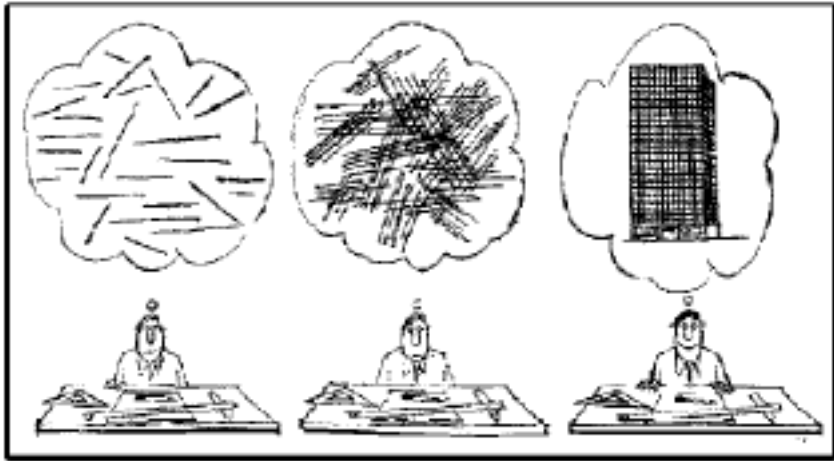

Directions:

Study the following picture carefully and write an essay entitled “ Order Comes from Disorder ” .

Your essay should cover these three points:

- 1) describe the meaning of the picture,
- 2) deduce another example to support the artist, and
- 3) give your comment .

Your essay must be at least 200 words and written neatly on ANSWER SHEET 2 . (20 points)

Order Comes from Disorder

The picture above assumed this idea: To build up a well-established skyscraper, one must always use a two-step process—from an unclear beginning to an orderly process of the process. Such an idea seems to inform us that order comes from disorder. Practically, is this really right? I do suppose so.

As everyone knows, a majority of natural laws are discovered by people's looking into a mass of disordered phenomena in the universe. The same case applies to laws. Take traffic jams, for example. At the very beginning, it was clear that less cars resulted in less traffic jams, thus less traffic laws were needed and put

into effect . With the rapid development of car manufacturing and with the improvement of human living standards, automobiles have become more and more popular among ordinary people . Under such circumstances, more strict traffic regulations have been introduced to control heavy traffic . Otherwise, urban life would be out of control . Of course people hate to live an unstable life and in a disordered society . Therefore, it is safe to conclude that order is necessary to ensure the peace in a society .

To sum up, there is no doubt that order comes from disorder, because to be orderly is to creatively reorganize disorder . We must actively trace and spot the essence of various disorders . Only in this way may we successfully design“ skyscrapers ”, as indicated in the picture .

Unity Nurtures Productivity

No sooner had I finished reading the pictures above than I got the idea that it is the unity that nurtures productivity. Sometimes we are given piles upon piles of building materials as happens in the picture. The following step we should take is to unite these materials so that we can turn the potential into substantial productivity.

It is not far-fetched if we compare the construction of a skyscraper to that of a nation. It is true that our nation is characterized by the process of unification, division and reunification. It is beyond discussion that we have achieved most of our glories during periods of unification, which is also the blessing and cheering state
