出版说明

由教育部考试中心推出的“英语等级考试”（简称“等级”）是一套全新的公共英语考试体系，是面向全社会的开放型英语水平测试系统。

等级测试分笔试和口试两大部分。笔试包括听力理解、英语知识运用、阅读理解和写作四个部分；口试分考生回答问题和考生相互问答问题两种形式。

等级测试体系的特点是既注重检测考生对英语知识的理解和运用能力，同时也注重考查语言交际能力，尤其突出听说能力的考查，使英语真正成为人们进行工作、学习和对外交往的工具。

等级考试共分五级：第一级略高于初中毕业生的英语水平；第二级相当于普通高中优秀毕业生的水平；第三级相当于在大专院校学习两年公共英语或自学了同等程度英语课程的水平；第四级相当于在大学学习了三至四年或自学了同等程度英语课程的水平；第五级相当于大学英语专业二年级结束时的水平。目前，第二级考试的成绩可替代自学考试非英语专业专科的英语成绩；第三级可替代自学考试非英语专业本科的英语成绩；第五级可替代申请公费留学的等级成绩。

等级的推出对我国外语人才的培养，对外语教学方法的改革及我国外语水平的整体提高将起到很大的促进作用。

结合教育部考试中心考试大纲提出的标准，我们请复旦大学部分外语教授编写了这套模拟试题。全书共分五册，每一级为一册，每一册内有五套模拟试题。读者通过操练，定能提高自己的英语水平和实战能力。

第三部分 阅读理解

阅读下列短文,从每题所给的四个选项[A][B][C]和[D]中选出最佳选项,并将该选项填在题目编号之前的括号内。

In summer and fall people and bears run into each other almost daily in or near town. That's because of the bears's *life cycle* (生活周期). Most bears spend winter and spring on Hudson Bay. They hunt *seals* (海豹) mainly during the spring, until the ice breaks up. When it melts in early summer, the bears come to shore. For months there's almost nothing to eat, so they sleep and wander around. They're fasting — it's sometimes called walking *hibernation* (冬眠).

They also walk right into trouble when they come too near the town. Policemen sometimes put repeat offenders to death, but they "arrest" most problem bears, then keep them in an empty house that can hold more than 四只.

There they are given water, but no food, which sounds cruel, but experts point out that there's little difference between a bear under "arrest" that isn't fed and a bear fasting naturally. These bears are set free north of the town after about a month. The freed bears join the wild ones on shore, waiting for ice to form on the bay (海湾) — a frozen bridge to the seals. The cycle is complete.

() 缘 According to the bears' cycle, in summer and fall they _____.

- [A] sleep and move about [B] come to live near the town
[C] hunt seals on shore [D] look for food on the bay

() 缘 When bears are fasting, they _____.

- [A] walk quickly [B] don't eat anything
[C] get into trouble [D] come across people

() 缘 If a bear walks along a street in the town, it will probably be caught by _____.

- [A] hunters [B] policemen [C] townspeople [D] experts

() 缘 Which of the following statements is NOT TRUE?

- [A] If a bear has frightened the townspeople several times, it will probably be shot.
[B] During the period when the bears are kept, they are only given some water.
[C] Bears go to town to spend the summer.
[D] Bears stay on shore waiting for winter to come.

() 缘 When ice is formed on the bay, _____.

- [A] a frozen bridge has appeared
[B] bears go into hibernation
[C] bears begin to live an active life
[D] bears are set free

If life sprang up through natural processes on the Earth, then the same thing could supposedly

happen on other worlds. And yet when we look at outer space, we do not see an environment where there exists life. We see planets and moons where no life could possibly *survive*(生存). In fact we see all sorts of wildly different planets and moons — hot places, dark places, ice worlds, gas worlds — and it seems that there are far more ways to be a dead world than a live one.

Within our solar system the Earth may be in a fairly narrow *habitable*(适于居住) zone, not too hot and not too cold, just the right distance from the sun that water can splash around on the surface in a liquid state. And there may be many other things that make life on Earth possible. The *tectonic*(地壳构造) activity recycles the planet's carbon. *Mars*(火星) has no such *mechanism*(构造), and this seemingly minor lack may be the reason Mars lost most of its atmosphere.

() 题源 What does the first paragraph mainly discuss?

[A] Life beyond Earth.

[B] Earth-like planets.

[C] Different worlds.

[D] Life and death in space.

() 题源 Which of the following statements will not be supported by the author?

[A] Life requires liquid water.

[B] Many factors led to life on Earth.

[C] Mars is not within the habitable zone.

[D] Mars used to have its atmosphere.

As people continue to grow and age, our body systems continue to change. At a certain point in your life your body systems will begin to weaken. Your strength may become weaker. It may be more difficult for you to see and hear. The slow change of aging causes our bodies to lose some of their ability to bounce back from disease and injury. In order to live longer, we have always tried to slow or stop this change that leads us towards the end of our lives.

Many factors decide your health. A good diet plays an important role. The amounts and type of exercise you get is another factor. Your living condition is yet another. But scientists studying aging problem want to know: Why do people grow old? They hope that by studying the aging medical science they may be able to make the length of life longer.

There is nothing to be afraid of as old age comes. Many consider the later part of life to be the best time for living. Physical activity may become less, but often you get better understanding of yourself and the world.

() 题源 When people become aging, they will lose some of their ability to bounce back from disease and injury. "Bounce back" here means _____.

[A] to escape from disease and injury

[B] to improve one's health after getting over disease or injury

[C] to jump backward

[D] to run fast

() 题源 In order to live longer _____.

[A] we have to try to improve our food

[B] we should try to do more exercise

[C] we should slow down the change of aging

[D] we should keep up high spirits

() 缘 Many consider the later part of life to be the best time for living because _____.

[A] they consider their life has been a successful one

[B] they have come through the battle of life safely

[C] they have less misunderstanding of themselves and the outside world

[D] they can play or rest more often

A period of one thousand years carries no special significance of its own. After all, it is only because we come equipped with ten fingers and ancient people used them to create base-ten mathematics that a thousand equals a thousand as we know it. If fingers plus toes had been used as the basis for our math system, a "millennium" would have 愿 愿 愿 years in it.

There's even disagreement as to just when the next millennium will begin. Because there was no year zero — our *calendar*(日历) goes right from 员 B.C. to A.D. 员 — many people insist we ought to put off our *champagne*(香槟酒) toasts until the arrival of January 员, 愿 愿 愿. But most of us will stay up on December 猿, 愿 愿 愿, watch the calendar show all those zeroes, and declare the new millennium born. And some calendarists have pushed the whole of B.C. back one year, put the year zero in the gap, and declare the disagreement solved.

Nevertheless, a thousand years, or two thousand years, is simply a cold mathematical sign until we humans begin *draping*(装饰) it with banners of hope and wrapping it in sheets of memory.

() 远 The writer thinks that the millennium is of no significance of its own because _____.

[A] ancient people counted on their fingers, not on their toes

[B] ancient people created base-ten math system

[C] it is simply a period of time if humans don't add their wishes to it

[D] ancient people happened to have ten fingers

() 远 According to our calendar, the first millennium began in _____.

[A] A.D. 愿 愿 愿 [B] A.D. 愿 愿 愿 [C] A.D. 员 [D] A.D. zero

() 愿 Which of the following statements is TRUE?

[A] Big celebrations are planned for the arrival of the next millennium.

[B] Major disagreement was solved before the arrival of the new millennium.

[C] Many people have the right to declare the new millennium born.

[D] Some calendarists have the right to push time back.

() 愿 On the eve of the next millennium, people will do all these things EXCEPT _____.

[A] exchange toasts

[B] sit up late

[C] have great expectations

[D] declare the disagreement solved

() 愿 Which is the best title of the passage?

- [A] Millennium Problems
- [B] Millennium Reflections
